## Glass Recycled

RECYCLED GLASS COUNTERTOPS, FLOORING, LANDSCAPING and DECOR

Recycled Glass Products LLC turns broken glass bottles and porcelain fixtures into beauty. Instead of mounting in a landfill for thousands of years, we turn post-consumer glass and porcelain into gorgeous countertops, fabulous flooring and landscape materials. By mixing crushed, recycled glass with an epoxy resin, we've created over 400+ sparkling terrazzo designs. If you can't find one that matches your home or office, you can design your own, based on color, size and finish.

Sustainability is very important to Recycled Glass Products LLC. Our terrazzo is easy to maintain and lasts as long as your building or home stands. Unlike marble, which has to be removed from the earth, our recycled glass is made from some of the 30 billion bottles that would otherwise end up in landfills.

We invite you to imagine the possibilities of Recycled Glass Products LLC. Browse our gallery of eco-friendly designs, and request a sample to see how it can look in your home or office.
