# Fleet Alert—Driver Monitoring Service

Organizations spend a considerable amount of time and resources recruiting, hiring and training their workforce, but tend to lose track of employees after they are hired. USA-FACT's Fleet Alert Monitoring Service can help you keep track of your workforce and manage employee risk more effectively.

The Information People

What is Fleet Alert?

Fleet Alert is a driver monitoring service that alerts employers of any new driver-related risks so appropriate actions may be taken to avoid costly claims. These driver-related risks include:

- Newly Issued Driver Citations
- DUI Convictions
- Revocations, Suspensions or Cancellations
- Approaching Renewal Dates
- Expirations

How does Fleet Alert Work?

Enrolling in USA FACT's Fleet Alert Monitoring Service is easy. Employers need only provide a list of their drivers along with their driving license information and release forms.

Once the list is uploaded to our system, each driver is pre-screened and a past Motor Vehicle History Report (MVR) is obtained and sent to the employer.

Fleet Alert then begins the monitoring process. The system checks, tracks, organizes and pinpoints important driving record information and sends monthly notices, with summarized details of new occurrences, to the employer.

Why Choose Fleet Alert?

- Helps you reduce your liability and ensures that only eligible drivers operate company and/or personal vehicles during company time
- Automates and streamlines the way you monitor your drivers and manage driving records allowing you to lower your administrative costs
- Identifies only new driver incidents, filtering drivers with no activity, allowing you to concentrate on those new records needing more detailed review
- Serves as a notice to drivers that they are being monitored which results in better driving
- Helps you improve your safety standards resulting in reduced insurance rates

Fleet Alert System Features

Fleet Alert's system automates and streamlines the way you monitor and manage your drivers and driving records, saving your company time and money. Below are some of the features of our electronic system:

- Dashboard of summary information, including new citations and licenses needing renewal for the current month

- Monthly notices that identify any new citations, revoked, suspended or cancelled licenses and any licenses approaching renewal dates

- Client customized adjudication criteria so you can identify the records that need further review

- Management portal allowing you to quickly view, add and/or delete drivers from your list and allowing you to filter drivers by group or location

- Secure, electronic hosting of all driving records for viewing 24-7
