

Homelessness Can Happen to Any Family...

...but it doesn't have to impact children's education!

Did you know...

- There is a federal law that guarantees continued attendance at the school of your choice? Even if you move out of the school's attendance area?
- That our school district will provide transportation to get children to school...even if they must move outside the neighborhood?

Homelessness is defined by the US Government to be:

**"Any individual who lacks a fixed, regular
and adequate nighttime residence."**

In addition to living in shelters, this can include:

- Doubled up with other families
- Living in temporary trailers
- Living in distressed or unsafe buildings
- Awaiting foster care placement

If you or someone you know needs help to keep kids in school so they can learn and grow with their friends, ask your classroom teacher or call our homeless benefits coordinator for more information.

"We are focused on students and it's our job to help!"
