

PROFILES OF SUCCESS

The Besen Group  
New York, New York  
Project Files

## Problem

The Besen Group, a real estate company, decided that they needed a more efficient and space saving storage solution for their growing property file collection. They needed a system that would expand their current storage by 30%, and one that would consolidate filing to allow for much needed floor space to house their growing staff.

## Solution

The solution was ThinStak® Shelving on a MobileTrak5® System, which allowed for vast consolidation of their current filing system. The ThinStak® shelving, with its lower height profile, allowed for more storage space that was easily accessible to office staff. Datum incorporated a custom designed third rail to distribute the system's weight load in order to meet building codes and regulations.

This new system not only exceeded their 30% expansion goal, but it also saved them from renting a larger facility to house their growing workforce.

Datum utilizes design programs to create 3D color renderings for customers to see exactly what their unique storage system will look like in their facility, from size and scale to color and aesthetic appeal, before the system is purchased.
