Security bollard covers

Impact-resistant security bollards are functional, but are often recognized as unattractive steel columns. Present exclusive decorative enhancements to these plain steel posts by adding decorative metal bollard covers.

Removable and retractable bollards

For sites where change of pathway or roadway access is required, Reliance Foundry offers a unique range of removable, retractable and collapsible bollards. All of these specialized bollards can be raised to protect a property perimeter, and are simple to remove or retract to admit occasional delivery, maintenance and emergency vehicles.

BOLLARDS

RELIANCE FOUNDRY CO. LTD.

- Period to contemporary architectural styles
- Meticulous attention to surface detail
- Wide variety of installation options to meet any site requirements
- High performance coatings for a long, maintenance-free life
- Extensive in-stock selection for rapid delivery

Architectural bollards

Decorative bollards enhance structural and site designs while defining perimeters, directing pedestrians & vehicles, and transforming drab security bollards into architectural assets. We offer contemporary styling choices as well classic choices with finials, fluting, bands & scrolls.

Traffic control bollards

Reliance Foundry's traffic bollards are used for pedestrian safety, perimeter protection, parking control, and vehicle access management. Street and road bollards can be arranged in a line close to a road or path, separating traffic from walkways to enhance pedestrian safety. By their mere presence, bollards act as visual aids to direct or deter pedestrian and vehicular traffic flow.

Landscaping bollards

Reliance Foundry's outdoor landscape bollards raise outdoor site definition to a new level with decorative perimeter accents used around many outdoor parks, malls, schools and fields. Reliance Foundry provides one of the largest collections of period bollards built to be used as stand-alone landscaping highlights, to attractively cover heavy-duty security bollards, or to passively direct pedestrian traffic in public areas.

BOLLARDS

RELIANCE FOUNDRY CO. LTD.

Reliance Foundry brings over 80 years of foundry experience to the design and manufacture of our bollards and post covers, providing elegant solutions for direction, protection and definition in your construction and streetscape projects. Top quality designs and materials are styled in period to contemporary choices.

Offered in steel, stainless steel, ductile iron, and light-weight aluminum, all of our bollards and security post covers are meticulously machined and can be powder coated in several standard colors for unsurpassed visual appeal and exterior durability.

Mounting options are available for virtually any construction setting. Whether you need your bollards to be mounted on new or existing concrete, asphalt or landscaping, Reliance Foundry provides the means to have your bollards installed with ease. Many of our bollards can be assembled ready to add chain links for maximum pedestrian and vehicular control.

From concept to production, from finishing to delivery - we strive to ensure that our bollards excel in functionality, and add real value to your facilities.
