

## FOR IMMEDIATE RELEASE

### **Blüroof Press: a new independent publisher hits the ground running.**

Read how a robotic-spaceflight engineer by day became a publisher by moonlight:  
[www.bluroof.us/about](http://www.bluroof.us/about)

Formed in January 2011 as an activity of [SCI](#) / Space Craft International, Blüroof Press intends to publish titles in non-fiction and fiction that come from a perspective that recognizes humanity's situation as descendants and heirs of an immensely rich history of stellar, planetary, and biological evolution on a rare water-planet orbiting an average star. Blüroof already has four non-fiction titles available in trade paperback. One of them is even downloadable free of charge! And Blüroof is proud to be publishing its first science fiction next month:

Ray Bradbury says, "Steven Leiva not only promises, but delivers!"

### ***Traveling In Space***

Steven Paul Leiva's unique science fiction first-contact novel from the point-of-view of the aliens; a 21st Century *Gulliver's Travels* with Homo sapiens as the Lilliputians.

Contact Blüroof to obtain a PDF copy for review purposes.

Trade paperback to be released October 15, 2011.  
PDF, Kindle, and other electronic editions to follow.

Here is a high-quality snapshot of the Jet Propulsion Laboratory's popular, award-winning tutorial for interplanetary mission controllers.

### ***Basics of Space Flight***

Interplanetary exploration explained by Dave Doody.

[Trade Paperback now in print.](#)

For information on the free electronic version, see [www.bluroof.us/downloads](http://www.bluroof.us/downloads)

COMING IN DECEMBER:

What's a scientist to do? Your team has just made and verified a monumental discovery. You want to share it of course. But the law (not to mention armed force) stands firmly in your way.

***Beacon***

Discovery of the Extraterrestrial Signal,  
and the Information Embargo.

(Author unlisted until release)
