

Colour Changing Disposable Beverage Lids

Heat sensitive lids that turn bright red when placed on a hot beverage

Product Features & Benefits

- A visual indicator that your beverage may be hot above 120F / 48C
- The Smart Lid returns to the cold dark colour as the beverage cools
 - A warning sign for premium insulated cups
- Patented sealing indicator, showing whether or not the lid is securely attached properly to the cup
 - Delivering a tastier beverage by eliminating that mouthful of cold coffee
 - Attracting customers to your brand through a world first in smart packaging

Implementation Advantages

- Works with all hot beverage types
 - Suits many of the major cup brands the world over
- Smart plastic additives are FDA and EU direct food-contact compliant
 - No additional transportation costs as the Smart Lid weighs the same as a quality white lid
- Raising the awareness of occupational health and safety concerns
 - A warning indicator built right into the lid, no extra add-on packaging required
