

# On the road from TDM to VoIP?

## We can put you in the passing lane...

### End-to-End Solution: Remove Migration Obstacles

#### Communications as a Service

PosTrack CaaS provides a complete voice solution without large capital outlays.

Integrate and manage any voice application from the cloud.

Fully mobile communications environment: users connect globally with smartphones, soft-clients, and IP handsets.

#### Fixed price service includes:

CaaS solution with leading VoIP handsets.

Phybridge data network solution for VoIP.

Built-in, multi-level disaster readiness.

All future upgrades/service enhancements.

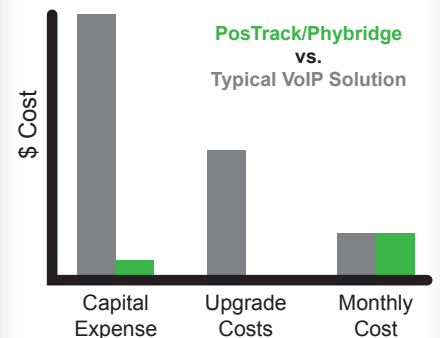

All trunking and long distance services.

### Compelling Financials

#### Immediate ROI

PosTrack's fixed-cost service eliminates PBX purchase, maintenance, and data network upgrade costs. This model substantially lowers migration costs and gives you the full benefit of the service on day one - without large capital outlays.

#### Lower Total Cost

**Total cost for end-to-end voice and data solution:**

**Under \$34 per user monthly**

**Contact us to begin your barrier-free migration to VoIP.**

### Sound Network Foundation

Using the Phybridge solution, we leverage your existing telecom cable plant to deliver IP connections and POE to your VoIP handsets.

Parallel network removes congestion issues on current data network, and improves service delivery for VoIP.

**TDM reliability in a VoIP environment.**

### Barrier-free Migration

No large capital outlays.

No business or network disruptions.

No new cabling or network overhaul.

No fluctuating costs.

No drastic change to your current business or IT management practices.
