ThermoSafe Brands announces launch of Envoy™ Off-the-Shelf Shipping Solutions

ARLINGTON HEIGHTS, ILLINOIS – (September 27, 2011). ThermoSafe Brands announced the introduction of the Envoy™ line of off-the-shelf qualified shipping solutions.

“ThermoSafe Brands recognizes that our customers require solutions tailored to address the needs of a wide range of shipping conditions. We’ve applied our engineering expertise to create [Envoy™ insulated shippers](#) —a simple, economical solution for our customers with less complex shipping needs,” said Prakash Mahesh, VP of Marketing and Business Development for ThermoSafe Brands.

“These products are designed to the ISCSilver™ Ambient Temperature Profile, which reflects more moderate shipping conditions, and they offer effective temperature performance for 1-2 day shipments and smaller payloads,” highlighted Ken Maltas, VP of Engineering.

The Envoy line of products provides solutions for a refrigerated temperature range and includes simple seasonal packouts. They feature foam bricks which maintain their shape and are easier to assemble than packouts using standard gel packs.

The first phase of the launch provides solutions for a refrigerated temperature range, with 2L to 7L payload capacity. “We believe this offering of design tested solutions can help our customers maintain product integrity further along the supply chain, at an affordable price point” added D’Arcy Ryan, Director of Marketing.

ThermoSafe Brands will be showcasing the Envoy product line at *IQPC Cool Chain Conference* in Philadelphia, on September 25th.

ThermoSafe Brands is the largest manufacturer of temperature assurance packaging and the leading provider of thermal testing solutions for Life Sciences customers. ThermoSafe Brands is a Strategic Business Unit of Tegrant Corporation, a premier manufacturer of highly engineered packaging solutions located in DeKalb, Illinois.
