Cloud Hosted
Management Solution

Private Virtual Data Center

A cloud based management system is ideal for businesses that require comprehensive service on a small budget. Get the features and benefits of a network without any of the hardware costs or installation and management headaches.

- Eliminate your ongoing hardware maintenance. No updates to load, security patches to maintain or new versions to install.

- Access your management system from a PC, Mac or iPad. Compatible with any device via a Citrix application.

- Secure server hosting with automatic backup and emergency recovery.

- Full management of IT resources built in.

- Supports multiple locations.

- Responsive Technical Support with priority telephone access.
