

ECS REFINING

State-of-the-Art Electronics Processing Stockton, California

Who We Are

ECS Refining is the industry leader in electronic recycling and end-of-life (EOL) services. Our services include end-to-end electronic recycling, precious metals reclamation, certified domestic destruction of data and proprietary materials, and asset refurbishment value recovery through B2B / B2C remarketing operations.

State-of-the-Art Processing

ECS's Stockton facility showcases the **most technologically-advanced** processing techniques in the world. This 263,000 sq. ft. facility employs automated processing lines utilizing multiple mechanical shredders, magnetic and eddy current separation technology, leading edge optical and electro-magnetic based sortation and in-line sampling systems designed to maximize recovery values for downstream commodities, and a **new high volume CRT glass processing operation**.

Quick Facts

- **Capacity:** The Stockton facility is designed to process more than 25 million pounds of material per month.
- **Location:** It's easily accessible from West Coast's Interstate 5, Interstate 80 as well as California State Highways - 4 and 99.
- **History:** The building is three years old, and was formerly operated by Kyoho Manufacturing California, which supplied pressed-metal parts to the now-defunct New United Motor Manufacturing Inc. (NUUMI) plant in Fremont.
- **Dock Operations:** The facilities have 12 operating dock doors and 24 additional "knock outs" for additional loading docks. We have the railroad spur running into the rear of the building.

e-Stewards Certified®

ECS Refining is an e-Stewards Founder and is "**e-Stewards Certified**" at its Stockton, CA and Terrell, TX facilities. The **Basel Action Network (BAN)** issues these coveted certifications to the few companies that can meet the e-Stewards domestic processing requirements and ISO14001. ECS also has one of the few permitted hazardous waste Treatment, Storage, and Disposal Facilities (TSDF) in California in Santa Clara, CA.

Inc 5000 Fastest Growing Private Company 2011

ECS Refining was selected as one of the Fastest Growing companies in 2011, demonstrating our ability to meet and exceed the needs of our customers!

Non "ECS e-Waste Processing" Subsidiary Companies/Divisions

- ECS Tin/Lead Smelter Operations – Terrell, TX
- ECS Aircraft Division – De-manufacturing & metal recovery on jet engines – Terrell, TX
- Outback Equipment, United Datatech, and ServoTerra equipment resale divisions

Contact us today for your national electronics recycling, EOL, or equipment resale needs!
