

NORIBACHI is

SMART ENERGY PRODUCTS INFORMED GRID INTERACTION POWER EVERYWHERE

Noribachi creates smart energy products, challenging rote relationships with energy and design.

Noribachi's product suite includes LED lighting, consumer electronics, solar devices, and engineering and design services.

These products integrate proprietary energy optimization technologies with renewable power capabilities and an uncompromising devotion to aesthetics.

With over 800 installations – including world class hotels and luxury automobile dealerships – representing a diverse variety of markets across the US and internationally, Noribachi is a leader in integrating self power and grid-independence with distinctive and human-centered design.

q.nuru:

q.nuru manufactures a full range of retrofit solutions comprised of options ranging from high performance, industrial LED bulbs designed to replace up to 1000W equivalents to luxury LED screw-in bulbs for homes and offices. q.nuru's parallel LED-based integrate solutions offer industrial lighting fixtures, artisan designed luminaires, and modern, haute design LED lamps for the consumer market. All of these products are also offered in a solar-hybrid mode.

smart energy lighting

p.nuru:

p.nuru believes that decreasing environmental impact shouldn't mean settling. Noribachi's goal is to redefine consumer electronics, turning informed grid interaction into the preferred standard, while fearlessly exploring the boundaries of form and design. p.nuru integrates smart power into a variety of electronic devices, from personal chargers to speaker systems.

smart energy electronics

t.nuru:

t.nuru creates high-end photovoltaic panels that challenge today's standard of functional but unsightly solar power. With the aesthetic freedom of designer panels, t.nuru provides solar energy that meets practical efficiency needs, while also realizing the potential for aesthetic sophistication in the solar market. t.nuru is a leader in advancing the concept of solar tiles, or modular solar panels intended to integrate into urban environments.

smart energy solar solutions

u.nuru:

Energy efficient applications require specialized power management capabilities. u.nuru also offers a suite of engineering, design, and installation services to give customers access to Noribachi's deep technical expertise.
