## A Sweepstakes Game Connection for Your Internet Cafe

We have outstanding sweepstakes games customers want to "reveal" their free game entries on! Here is a sampling of our many game titles.

**We're Setting the Standard in the Amusement Gaming Industry!**

Our internet Back-Office Sweepstakes System (iBoss) will provide you with all the day-to-day operating tools needed to efficiently run your Internet Café including;

**Exciting Games:** We offer a wide variety of captivating and dynamic animated games that pop off the screen and routine new game updates! Plus every game has an "instant reveal" option for easy quick review by customers!

**Finite Pay-Table Pool of Entries:** Exclusive software design by in-house engineers that meticulously calculate the mathematical formulas of predetermined winners and losers that will outperform our competitor's pay-tables and keep customers in a "warm seat" in your location longer!

**Equipment:** We offer Viewing Terminals, a Location Based Server, Cashier & Manager Stations and even work stations! Our games are piped into your Location Based Server, so all game reveals are done in-store rather than "web-based" to avoid hassles with internet connections!

**Turn-key Service & Support:** Our installation team is readily available if you require a complete One Stop Shop program. We'll train you and your staff and set-up your entire Internet Café in just a few days and hand you the keys!

**Management Reports:** Track every transaction, cash flow, payouts, game play, promotional rewards and more on-site or remotely!

When you join our iBoss "Plug n' Play" Connection with the opening of your Internet Café, we'll provide you with non-stop support! Location service now available in several states.

**Call us now to get started! Be the first in your area to open an Internet Café using the best games on the market today supported by the iBoss Connection!**
