

**The Easiest Universal
Single Member Sizing program for ALL
Engineered Wood and Lumber Products**

iPro® Xpress™ now empowers designers to quickly size and design any structural beam member in one single powerful program — saving valuable time on every project.

iPro® Xpress™ – Product Selector

Allows quick and easy multi product selection from the standard ranges of Engineered Beams and I Joists available in the industry. Enables fast and efficient performance comparison between products.

iPro® Xpress™ – Visual Results

Clearly and graphically presents the output from your beam design. "Smart Bar" lines indicate how much beam capacity is used or still available in each engineering value category.

and

delivering freedom of choice and ease of design for EWP designers and lumber engineers

iPro® Xpress™ — The Single Member Sizing Program for all Engineered Wood and Lumber Products Less Time – Greater Productivity

KEY FEATURES

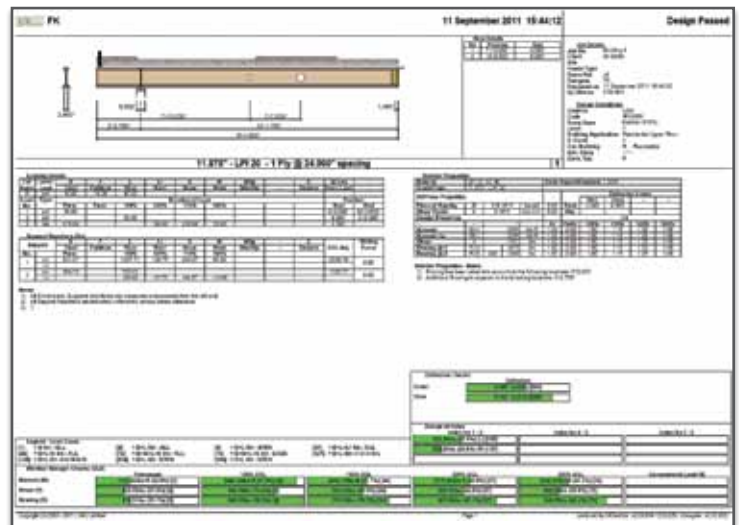

- Always current with live updates.
- One software – multiple choices.
