AZ Owned, Service-Disabled Veteran Technology Firm Attends Hiring Our Heroes Job Fair

CHANDLER, AZ – October 10, 2011 – Cloud Computing Technologies, LLC, a wholly owned division of Castillo Technologies, LLC, attended the Hiring Our Heroes Job Fair held September 29th, 2011 at the El Zaribah Shrine in Phoenix, AZ. Hosted by the U.S. Chamber of Commerce, Department of Labor Veterans Employment and Training (DOL VETS), The Arizona Chamber of Commerce and Industry and local chambers, the event was open to active duty military members, Guard and Reserve members and eligible spouses with opportunities to network, market themselves and speak with potential employers.

"We were very excited and pleased to participate in the Hiring Our Heroes Job Fair," said Alan Castillo, President/CEO of Cloud Computing Technologies. "As a veteran myself, I closely associate with the specific challenges of our service men and women and the need to transition their skills into the private sector. Our American heroes have served their country by putting themselves in harm's way and now are seeking employment opportunities in the nation they have protected. I feel honored to provide potential employment opportunities to them."

About Hiring Our Heroes

On March 24, 2011, the U.S. Chamber of Commerce launched its Hiring our Heroes program, a year-long nationwide effort to help veterans and their spouses find meaningful employment. The Chamber started the program in partnership with the Department of Labor Veterans Employment and Training Service (DOL VETS), to improve public-private sector coordination in local communities, where veterans and their families are returning every day. Working with our extensive network of state and local chambers, DOL VETS, the Employer Support of the Guard and Reserve (ESGR) and other strategic partners we will do a better job of matching veteran talent with career opportunities in the private sector.

In the coming year, the U.S. Chamber will host 100 hiring fairs with local chambers of commerce across the country with the only measure of success being jobs for the one million unemployed veterans in America.

About Cloud Computing Technologies

Cloud Computing Technologies, a wholly owned division of Castillo Technologies, LLC. Cloud Computing provides public or private, next generation remote server, software as a service, and file storage solutions to the public and private sectors. As a leader in the industry, Cloud Computing provides individualized, business-goal focused assessments of IT needs now and for the immediate future. Analysis and reporting processes holistically address the needs of growing business operations, their workforce connectivity and evolving technology to apply best-in-class solutions. Cloud-centric service offerings include utilization and migration implementation to cloud services, maintenance and support, public, private and/or hybrid cloud configurations, telecommunications, data and transaction security, web 2.0, and virtualization.

Castillo Technologies is a Service Disabled Veteran-Owned Small Business verified by the Center for Veteran Enterprise (CVE). It is the policy of Castillo Technologies, LLC to provide equal employment opportunity to all persons regardless of age, color, national origin, physical or mental disability, race, religion, creed, gender, sex, sexual orientation, gender identity and/or expression, marital status, status with regard to public assistance, status as a disabled veteran and/or veteran of the Vietnam Era or any other characteristic protected by federal, state or local law.
