Sixclear Sixth-sized Course Offerings

1. **The LabVIEW Refresher:**
   Takes those with previous but rusty experience in LabVIEW and brings them back to the pinnacle of peak programming prowess while analyzing and resolving common LabVIEW programming pitfalls.

2. **The Manager's Overview:**
   We often find managers enrolled in our week-long training just to be able to understand what their engineers and scientists are saying. Why not save time and take a course designed for you? We help you understand the LabVIEW development environment, dependencies, and capabilities to evaluate and apply LabVIEW for your next project.

3. **Sixclear CLAD Prep:**
   Tired of prepping for the CLAD exam without any good feedback mechanism to let you know how well you'll do? We walk you through the typical questions and topics that regularly show up on the exams, as well as strategies to deconstruct the questions. We'll even take a couple exams and grade them on the spot.

4. **Sixclear CLD Prep** *(Can be delivered in 1 or 2 days)*:
   The CLD is months of preparation followed by 4 hours of coding at breakneck pace, then weeks of waiting to see if you passed. A healthy percentage don't. Let's ensure you're not among them. We dig into the mind of the grader to find what they're looking for, strategies for preparation and test day, and then take a full length exam. The next morning we come back to you with it fully graded and commented, that's something you won't even get from the actual exam.
