

eim offerings

Evidence In Motion provides a wide variety of educational and consulting offerings, all focusing on elevating the physical therapy profession through evidence-based practice.

Orthopaedic Physical Therapy Residency: An 18-month program consisting of post-professional clinical and didactic education designed to advance the resident's preparation as a provider of patient care services in orthopaedic physical therapy. 90% of course work is web-based, so it happens wherever you happen to be.

Sports Physical Therapy Residency: An 18-month program of post-professional clinical and didactic education designed to develop graduates as highly skilled, autonomous practitioners with advanced competency in the care of patients with a full spectrum of athletic injuries. This Residency focuses on evidence-based practice and will position therapists to achieve SCS certification and become leaders in the sports physical therapy field.

Fellowship in Orthopaedic Manual Physical Therapy: An 18-24 month program preparing an experienced clinician or board-certified clinical specialist in the subspecialty of orthopedic manual physical therapy. The program is designed to graduate clinician scientists skilled in the evidence-based integration of thrust and non-thrust mobilization/manipulation and other manual techniques into the overall care of patients with musculoskeletal conditions. This is a highly specialized area of study often leading to teaching, research, and other professional leadership activities.

Transition DPT in Musculoskeletal Management: An 12-18-month program designed to bridge a Bachelors or Masters degree to the Doctorate level. This program allows physical therapists to fast forward their clinical expertise in musculoskeletal physical therapy practice and stay competitive in today's rapidly changing healthcare environment.

Executive Program in Private Practice Management with optional tDPT: An 12-month program of post-professional education designed to enhance the business savvy and sophistication of private practice physical therapy with evidence-based business and best practices. Areas of study include: finance and accounting, marketing, business strategy, management, leadership, technology and customer service.

Continuing Education: EIM offers a variety of evidence-based continuing education courses in the forms of [online self study](#), [hands-on courses](#) ([course schedule](#)) and [web-based interactive courses](#). [OCS Prep](#), [Certification Programs](#), and [Emergency Response Certification](#) courses are also available.

Products and Subscriptions: [Clinical textbooks complimented by CD's](#), [online lectures](#), [rehabilitation training kits and packages](#), and [clinical diagnosis iPod/iPhone apps](#) that have been developed by key faculty and program directors are available for purchase. Subscriptions include [Evidence Express](#), an evidence-based "push" service that delivers physical therapy journal pieces and news via daily emails, and the [EIM Online Journal Club](#), a product designed to help busy PTs keep up with the latest research. [EIM PT Mobile](#) is EIM's app for iPhone/iPad and Droid.

Consulting: Training and resources that will allow you to practice evidence-based therapy and market your clinics' clinical excellence. Consulting services are delivered to your practice by experts in both the clinical and business fields through consultation visits and leveraged technology with the goal of immediate translation into the care of your patients.

Evidence In Motion®

Dedicated to Elevating the PT Profession

“This is a model which will effectively change therapists practice patterns! The old/current model so prevalent has proven time and again to be very inefficient and has done little to move our profession towards EBP.” -Steve Finn

“I would definitely recommend this program to other PTs... I have also been able to communicate with some of the giants in our field, which has been amazing and very inspiring.”- Matt Anderson, Residency Grad

“Now, after this weekend, I feel like my toolbox has been filled and my mind is racing with all of the techniques I want to perform on my current patients.” -Alison Wright, CE participant

“...thank you for this program...we have had a complete transformation in our practice already. Not only that, we are enjoying running our practice now - we are excited again.”- Executive Program Student

“I will be honest...I've wondered how well a "distance learning" manual therapy residency would work...but now I understand how, with ground work well laid in advance, "just a weekend" can yield quite a bit of hands-on learning which can be taken into the clinic.” -Jennifer Stone, Residency Student

“Overall, my practice will change tomorrow, and I feel much more confident that I have the tools necessary to effectively treat my patients.” -Rebecca Filson, CE Participant
