Affordable

From the Office

From Any Device

From Anywhere
in the World

SIMPLIFY YOUR BUSINESS WITH LevelCloud

Technology plays a crucial role in your company's success, but it shouldn't consume your resources. Imagine making your IT a simple utility instead of a complex system to maintain.

LevelCloud delivers your entire network securely, reliably and cost effectively.

How and where can I use LevelCloud?

How can I reduce IT expenses by 30-50%?

How do I know my company data is safe?

LevelCloud Helps Your Bottom Line

Tired of buying new servers, upgrading software and trying to keep up with technology? Now your company can enjoy enterprise-level technology without all the hassle; LevelCloud makes IT affordable.

- Reduce capital expenditures and maintenance
- Scalable - use only what you need
- Focus resources on business initiatives
- Reduce your energy bill and carbon footprint

Any Device, Anytime, Anywhere

Whether you're at your office, at home or on the golf course, your entire network is at your fingertips. LevelCloud delivers a virtual office, regardless of location or device.

- Work from a PC, Mac, laptop, tablet or smart phone
- Replace desktops with thin clients
- 24/7 worldwide secure access
- Say goodbye to VPNs and remote login software

A Secure Choice

LevelCloud is built on industry leading data centers worldwide to ensure high availability and security. Your data is encrypted and no longer vulnerable to disasters, theft or hardware failures. LevelCloud offers unparalleled safeguards once only available to large enterprises.

- Control access to your network by user, location, device or time
- Daily back-up of your entire network
- Two-factor authentication for advanced security

Will our apps run
on LevelCloud?

How do I stay ahead of
my shrinking budget?

Is this a reliable
solution?

Custom Software? Not a problem!

LevelCloud delivers everything from common office software, accounting packages, and even custom developed applications your company uses today. LevelCloud is a flexible approach to handle all of your apps, data, e-mail, company files and more.

- Company-specific databases
- Latest Microsoft Office suite
- Enables greater collaboration

No More Servers

Free yourself from the limitation of your hardware. LevelCloud delivers the computing resources you need when you want. IT Directors can now focus on profit-generating solutions and avoid the risk of owning and maintaining infrastructure.

- LevelCloud powers your network
- Extend life of devices
- Easy user management and access

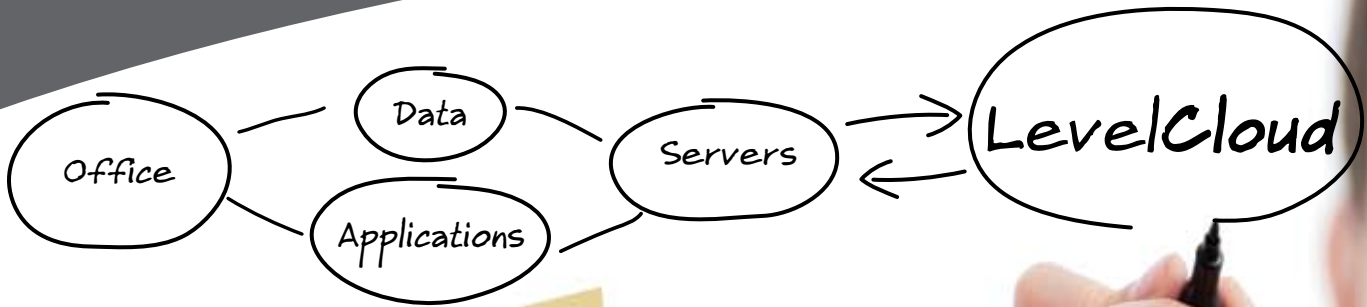

Downtime is Not Included

With your company's dependence on technology, downtime is not acceptable. LevelCloud delivers your network on enterprise-level platforms. The level of redundancy and safeguards in place are beyond what has been available to most businesses in the past.

- Highly secure tier 4 data centers
- Redundant hardware, cooling and connectivity
- Multi-site replication available
- 24/7 live support
