

# VP77 Video Player

with optional button/motion interface

## Product Preview

The VP77 is a multi-function digital media player especially designed for the **Hi Definition** digital signage and kiosk market. With the compact and industrial design, the VP77 allows you to store and playback full-motion 1080p HD video content, audio and/or picture files with high-speed Compact Flash card or USB Drive. Major file formats are supported such as MPEG-1, MPEG-2, MPEG-4, DivX, AVI, JPEG, and MP3. Using the VP77 is easier than ever, simply insert the CF card or USB drive with desired clips and/or pictures into the VP77 and turn the player on. With a built in auto start, autoplay function, your files will begin to play and loop automatically. The VP77 can also be set up to stream video over your internal LAN. The VP77 player can also be connected to our 5374 control board to allow for "dry contact" video triggering. This is extremely useful for applications where a looping attract screen is playing and a patron can choose to play a desired video file by pressing a corresponding button. The VP77 outputs NTSC, PAL or VGA thru HDMI, VGA or Composite Video. Best of all, the VP77 is an industrial looping file player, designed and built to play 24/7 for 4+ years and is backed by a 2 year warranty.

### Features

- Supports multiple forms of playback:
  - Photo
  - Video
  - Audio
- Video out: VGA, HDMI, S-Video and Composite Video
- Audio out: Stereo L/R (line level)
