

2x the thickness of a typical **“THICK”** postcard!

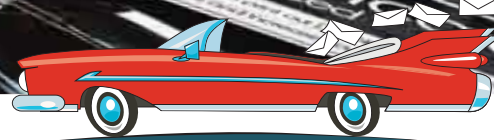

Heavy Postcards

GET NOTICED

Postcards are one of the simplest, least expensive and effective forms of direct mail. Thicker postcards catch the eye (and fingers) of your prospects, they stand out more and dramatically increase response rates.

Our **Double Thick Impact Cards** are designed to run through standard digital presses. They are perfect for short run and variable data jobs!

You can produce 24 point postcards on your digital press, contact us to find out how!!
