### **ABOUT THINGTANK LAB**

The ThingTank Lab is an open, community based collaborative ideation lab: a place where the exploration, experimentation, and exchange of ideas are developed towards the building of internet enabled “things”. Since 2009, ThingTank (formerly DDiMIT) has been offering workshops and roundtable events aimed at fostering and supporting activity in this exciting area. The Lab also works with academics and people from private enterprise interested in idea generation related to building things that address real world problems. Building upon this expertise, ThingTank now offers professional learning courses. For more information, visit [thingtanklab.com](http://thingtanklab.com).

*The ThingTank Lab was made possible through The Entertainment and Creative Cluster Partnerships Fund administered by the Ontario Media Development Corporation (OMDC) on behalf of the Ministry of Tourism and Culture and the continuing support of the Faculty of Information, and the Knowledge Media Design Institute at the University of Toronto.*
