**NEW!** The Only UPS with an Extendable LCD Control Panel  
Safeguard mission-critical servers, telecom equipment, VoIP & networking hardware

## Smart App Sinewave PR750LCD Mini-tower UPS

The CyberPower **Smart App Sinewave PR750LCD mini-tower** uninterruptible power supply (UPS) safeguards mission-critical servers, telecom equipment, VoIP and networking hardware requiring seamless pure sine wave power. Full Automatic Voltage Regulation (AVR) delivers consistent clean power. Patented GreenPower UPS™ advanced circuitry reduces UPS energy costs by up to 75% over conventional UPS models.

The PR750LCD model has the capacity of 750VA / 525Watts, six NEMA 5-15R receptacles, two maintenance-free 12V/7.0ah batteries and connectivity via one HID USB, one DB9 serial port and one emergency power off (EPO) port. EMI/RFI high capacity filters protect all connected equipment for noise interference.

To learn more about the **PR750LCD** from CyberPower visit [CPSwww.com](http://CPSwww.com)

The LCD Control Panel includes 41 different settings:

- 11 Different parameters
- 23 Setup & control settings
- 3 Battery test & calibration options
- 4 Log menu selections

The extendable LCD Control Panel can be relocated up to 4.5 ft. away from the UPS for easy viewing when installed in hard to reach locations.

**Introductory Rebate until November 30<sup>th</sup>.**  
Rebate: \$20.00 MSRP: \$299.95
