

Trays, containers & portion cups

These earth friendly foodservice containers are a natural, unbleached solution to the environmentally conscious grocers' needs. The trays, containers and portion cups are freezer, microwave and oven safe making them some of the most durable products on the market. While also being 100% compostable. They will break down in 30-90 days in both home and municipal composting environments. The bulrush and other plants used to make these containers are fast growing and regenerate easily, so they are an ideal raw material that is both sustainable and annually renewable.

The fibers are pulped, then molded into a variety of products including supermarket trays, food trays, sushi trays and portion cups. The supermarket trays are a great alternative to the polystyrene trays currently used by grocery stores to package meat. The food and sushi trays with their higher sides and available lid makes them excellent for packing freshly prepared deli or take-out foods. And the portion cups round out the line by providing a green alternative to the common plastic condiment cups.

Item #	Description	Case
Food Trays		
580-50516	16oz Bulrush Tray (6.5 x 6 x 1.5")	500
580-30124	24oz Bulrush Tray (6.5 x 6 x 2")	500
