Watch*IT OPC™
Process Alarm Management Tool

WebExpress

Bringing Your Systems Into View

View Shop Floor Data on Google TV and Other Web Enabled Devices

Watch*IT OPC is an application that delivers information from a various sources to you in many easy to use ways.

Google tv

The information sources can be Distributed Control Systems (DCS), Building Automation Systems, or any other source that provides OPC data, while the values can be room temperatures, vessel volumes or weights. The Information can also be things like system messages, events or alarms and many other types of data.

Watch*IT OPC takes all these data points and delivers them to individuals or groups of people.

Watch*IT OPC™

Each Person or Group can set which data points they wish to recieve and set the alerts on those points.

E-Mail

At the core of **Watch*IT OPC** are Email alerts. Whenever a value crosses the threshold you set, you get an Email sent to you.

Mobile Apps

Express Mobile allows you to install the free **Watch*IT OPC** App on the 4 most popular smartphone platforms. This enables you to not only get alerts but see trends and current values in the palm of your hand.

Built In Web Server

Google tv

Watch*IT WebExpress has a built in web server that creates a dynamic web site that you can visit with your web browsers and display data in a variety of ways. This allows web enabled devices to display your data over your existing wireless network. You can use Google TVs in meeting rooms, break rooms and hallways to provide information at a glance.

Is Easy, Powerful And Did We Mention, it's Easy
