# FileHound

FileHound, file found!

FileHound is the easiest way to find and access your computer files from your iPhone or iPod touch while on the go! With two taps, you can instantly see a list of all your documents, photos and music. Find your files from the recent items folder or use the search feature. No matter where you are, FileHound will fetch the files for you in a flash!
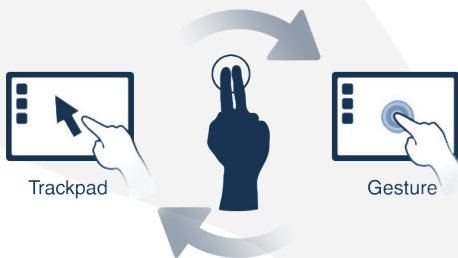

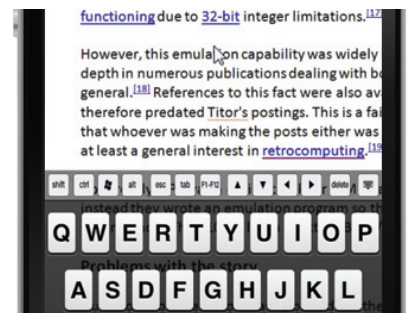

Access from anywhere without syncing

You'll never have to sync your files. Without having to upload your files to cloud storage or transfer them to your phone, you won't have to worry about storage limitations or privacy concerns. FileHound turns your computer into a personal cloud!

View and edit files in any format

Want to do some editing on the go? Not a problem. FileHound allows you to view and edit your files (Word, Excel, PowerPoint, etc.) as if you are sitting in front of your computer. Open files through Splashtop's award-winning remote desktop technology and edit away using programs you're already familiar with.

Designed for small screens

Simply navigate by using the default Trackpad mode for ultimate precision. There's even a shortcut toolbar to toggle between browsing and editing modes, activating the keyboard or scroll bar, zooming in or out, or disconnecting the session. FileHound is specifically designed to be super easy to use on mobile devices with small screens!
