MVP Systems Software Offers Converter for NAI's Automate™

11 November 2011 – MVP Systems Software, Inc., a leading provider of enterprise job scheduling and task scheduling software, announced today that MVP is offering an *Automate to JAMS* conversion utility. This utility makes it very easy for organizations to move their batch processes and workflows out of NAI's Automate™ and into JAMS Job Scheduler.

Besides for the conversion utility itself, MVP is also offering aggressive pricing for Automate™ customers. This means that customers can convert to JAMS and potentially reduce their costs.

“We are aggressively targeting other vendors who simply charge too much in terms of maintenance fees for their software,” states Don Malinowski of MVP. “We run into companies all the time who state that their budgets are being squeezed by vendors charging exorbitant maintenance fees. We want to help them move to a more reliable and powerful job scheduling platform and, at the same time, lower their overall costs.”

Southwest Power Pool, First Bank of Delaware, Dominion Diagnostics, and Advancial Federal Credit Union have all used the AML Conversion Utility to move to JAMS.

MVP Systems also has conversion utilities for more than a dozen other job scheduling vendors including UC4/Appworx, BMC Control-M, and CA Autosys®.

For more information on MVP's Conversion Programs, please email ConvertMe@JAMSScheduler.com.

About JAMS (Job Access and Management System)

JAMS is the only job scheduling system built on a .NET framework and is the first enterprise job scheduling system that can be leveraged by both IT Operations Personnel and Application Developers. With its roots in Windows, JAMS also supports running processes across a variety of operating systems (UNIX, Linux, System i, OpenVMS, etc.) and applications (SAP, SQL, Oracle, PeopleSoft, Symitar, Ecometry, etc.) To learn more about JAMS, please visit www.JAMSScheduler.com or call 800-261-JAMS.
