Play, learn and evidence

An exciting collection of computer
activities for young learners

No internet connection required!

An innovative collection of interactive computer activities for 2-5 year olds

Perfect for nursery settings, childminders and home users, *Early Years World* features a collection of mini-adventures and activities designed to nurture IT skills in young learners. *Early Years World* is brought to you by Sherston Software, with a 25 year history of delivering educational software and solutions into schools and nurseries. IT skills are developed through beautifully engaging activities designed around the Early Years Framework including mathematics, problem solving and phonics. Together they give children a head start in preparation for primary school. Children can be left to enjoy the games by themselves or be supervised, enhancing language and communication skills as you go.

What are mini-adventures?

Children adopt a character who leads them through a series of activities, ending in a creative task. Perfect for independent learning or under guidance.

Offline, online?

Nursery settings and childminders can choose to use *Early Years World* offline: perfect if you don't have an internet connection. Plug in the *Early Years World* memory stick and you're all set. Where an internet connection is available, you can connect to that too – adding to the flexibility in your setting. Home users get access to the online service – available whenever you need it.

Check out these great features:

Early Years World is exceptionally easy to use and designed with nursery staff and childminders in mind. Get the resources for your children in just a few clicks.

Comprehensive activities

Features over 160 activities and 56 mini-adventures, all divided into age ranges and levels of difficulty. Activities get progressively more skilful while developing the child's basic and IT skills.

Printed evidence/record sheets for nurseries and childminders

Early Years World makes it easy to produce printed record sheets to show evidence of children's progress. Ideal for record files and evidencing individual learning journeys. 'Parents as Partners' sheets help share children's achievements with parents and carers.

'GO DO' Activities

To help to encourage children to play and learn away from the computer. Printable sheets suggest fun, educational activities to complement *Early Years World* mini-adventures.
