

Kiosk software - the most powerful management system for interactive kiosks.

Setting up, or running a self-service estate without Genkiosk? That's like trying to drive blindfold.

Why? Because Genkiosk puts you in touch with all your kit, reporting on performance as well as user activity.

It's as if your machines can suddenly talk – sharing their secrets:

The top five sectors for Genkiosk to date are:

- Accessing Internet / Information
- Photo
- Bill Payment
- > Money Transfer
- Retail.

More details on each are available at: <u>www.genkiosk.com</u>.

And the core functionality of Genkiosk is adaptable to customers' specific needs as well as other sectors.

Maximising uptime

Send Scheme	ID: Name:	
Jobs Pending	Location	
Illestart when free	Description	

Each kiosk can be controlled to maximise performance – including revenue.

And the results tracked by location, across regions or nationwide:

Full security

Registry, file and directory security is set centrally using the content control system with schemas, so you can be sure that all the kiosks on your network are locked down and secure.

Benefits

The advantages of Genkiosk for the end-users are straightforward. They get to do what they want easily and quickly – with minimum disruption through performance issues or downtime.

For our customers it's a lot more advanced. Genkiosk puts all the information on hand and then helps them see through the data smog with alerts, alarms and reports.

To see the benefits in action or find out more, just get in touch:

www.genkiosk.com
