Plus Computer Solutions Provides Strong Financial Solution to St. James Community Service Society

Sage Business Partner, Plus Computer Solutions reduces Reconciliation Process from 2 months to 3 days per year!

Burnaby, British Columbia — November 17, 2011 - St. James Community Service Society (SJCSS) is a broad-based social service agency providing care and support for the most marginalized and vulnerable, while also working to transform communities for the future. SJCSS takes its mission and financial stewardship very seriously and therefore relies on the strong financial and accounting solution of Sage ERP Accpac expertly backed by Plus Computer Solutions. "Plus Computer Solutions has been our support team since the beginning," recalls Deepak Sharma, manager of adult guardianship for SJCSS. "They have always provided great service and have our best interests at heart."

Until recently SJCSS utilized another software application to track its accounts receivable, which consisted primarily of administration fees charged to its guardianship clients. "We had been using it for years, but then had to import its data into Sage ERP Accpac," says Sharma. Plus Computer Solutions helped us analyze our operations and recommended that we begin using the Accounts Receivable module of Sage ERP Accpac. We took their advice and it works very well for us. Having all of our business data in the same application saves time and effort and is much more convenient."

"Our board of directors appreciates that we now have a clear and complete audit trail in one application," says Sharma. "We balance to the penny each month and the entire reconciliation process is complete in just two hours. Before it took us five or six days!"

###
