

Unbeatable Features Will Make [Nokia N9](#) a Tough Competitor of Apple iPhone 4S, According to Research Conducted by Ontario Based Research Company.

[Nokia N9](#) is the latest release from Nokia that is yet to hit the market in this part of the world. However, millions of mobile users have made it the talk of the town already. A recently conducted research has suggested that this feature packed Smartphone from Nokia is good enough to give stiff competition to Apple iPhone 4S. This research was conducted by Ontario based private market research company named Internet Marketing Services.

Ontario (PRWEB) November 22, 2011

A recent market research conducted by Internet Marketing Services has indicated that [Nokia N9](#) is going to be a strong competitor of Apple iPhone 4S when it releases globally. The research was conducted considering all the features of the two leading Smartphones in the market. This newly [Nokia N9](#) is not yet available in Canada, and mobile users are eagerly waiting for the Smartphone to arrive with phenomenal features. The Apple iPhone 4s was released in the Canadian market during the month of October. Market experts are suggesting that comparable features and price will make them close competitors in the Canadian market once [Nokia N9](#) releases in Canada.

[Nokia N9](#) is undoubtedly the best looking Smartphone that Nokia has released in the last few years. The handset provides amazing durability, thanks to the strong polymer body. The manufacturers have claimed that scratches or dents will not show up because of the scratch resistant polycarbonate casing. [Nokia N9](#) is the first ever fully touch Smartphone that Nokia has manufactured. There is no keypad or button in the front, and the volume and the lock button are on the right side. On the other hand, Apple iPhone 4S has mostly retained the looks of iPhone 4. The built quality is great, but the phone is not as good looking as [Nokia N9](#). In terms of functionality both the phones are packed with state of the art features that are any mobile user's dream. It is very difficult to choose between the MeeGo operating system in [Nokia N9](#) and Apple iOS 5 in Apple iPhone 4S. Both the handsets are equipped with highly advanced 8 Mega pixel cameras with a flurry of features. Apple iPhone 4S holds a slight edge with regards to the pixel density and display resolution. Whereas, [Nokia N9](#) has better feature in terms of its RAM and GPS functionality. Only time will show which one of these two great Smartphones will prove to be the smarter.

About Internet Marketing Services: Internet Marketing Services is a private market research company that conducts market research on various topics. The company is based out of Ontario.
