## Making Mobile Business Intelligence easy

Yellowfin provides Business Intelligence anywhere, anytime, on any platform

“The more people within a business who have access to the benefits of quality BI, the better equipped organizations will be to respond to, and take advantage of, opportunities and shifts in their business environment.”

### Summary

- Yellowfin Mobile BI supports fast and accurate organization-wide decision-making leading to sustainable competitive advantage
- Yellowfin Mobile BI increases workforce productivity
- Yellowfin Mobile BI increases profits by improving customer satisfaction

### Yellowfin® is making Mobile BI easy

Yellowfin Mobile Business Intelligence easy on any device or platform, via native applications for the iPhone, iPad, Android devices and new HTML 5 integration.

Yellowfin's Mobile BI applications for the iPhone, iPad and Android devices provide business professionals with the flexibility and security they require to access business critical

information, wherever they are, and wherever they need it.

Yellowfin's flexible, fast, secure and easy-to-use Mobile BI applications offer a cost-effective means to keep people of all business backgrounds and technical capabilities within an organization in touch and up-to-date. Yellowfin Mobile BI ensures that actions and decisions are effectively aligned with organizational strategy.

# Mobile Features

“Yellowfin for the iPhone, iPad and Android devices takes advantage of their native features.”

## Native iPhone, iPad and Android functionality

Yellowfin for the iPhone, iPad and Android devices supports and takes advantage of their native multi-touch interfaces and functionality features.

Additionally, Yellowfin for the iPad and Android tablet devices has been engineered to take full-advantage of the large screen functionality. Users can:

1. View all their reports and data at native high-resolution picture quality
2. Select, drill down and through data points by swiping or touching the screen

3. View reports and data in portrait or widescreen modes - Yellowfin's User Interface senses device orientation and shifts to match

With Yellowfin for the iPhone, iPad and Android devices, you can email and comment on reports, filter results, drill down and through data with the flexibility to make business decisions wherever, and whenever you need to. No extra training is required – just connect and go. Yellowfin for the iPad also offers offline data exploration – clients can choose to cache data on the device.

## Customizable data delivery

With Yellowfin's iPhone, iPad and Android applications, data delivery can be personalized in four distinct ways:

1. **Push/schedule reporting:** Reports can be broadcast on a regular basis
2. **Pull reporting:** Users can request reports on demand
3. **Exception and alerts:** Proactive alerts can be sent to warn users about abnormal or unscheduled events and incidents
4. **Sharing:** Authorized users can share reports, information and insight across devices and platforms to collectively solve problems and make decisions

## Summary

- Yellowfin Mobile BI supports iPhone, iPad and Android native functionality
- With Yellowfin you can personalize data delivery
- Yellowfin's security infrastructure protects your data assets

## Secure data access

Yellowfin's applications for the iPhone, iPad and Android devices use exactly the same security infrastructure as your Yellowfin report server. Security of your business critical data is assured. Yellowfin's multi-tiered security

model gives you the confidence necessary to implement widespread Mobile BI reporting and analytics.

Offline data exploration is password protected and enabled at the discretion of the Yellowfin client.

# Benefits of Mobile Business Intelligence

## Three core types of users will benefit from the implementation of a Mobile BI solution

**Senior management:** Time-poor executives will appreciate the ability to access Key Performance Indicators at a glance whilst on-the-go.

**Key sales people:** Having access to real-time sales data, provides the information needed to increase sales via up-selling and cross-selling, and act upon opportunities as they unfold.

**Field service personnel:** Pro-active alerts and access to both real-time and historical data – detailing current customer needs and past behaviors – will lead to increased efficiency and productivity 'in the field'.

## Rapid implementation

Yellowfin's Mobile BI solution delivers fast real-time reporting and analytics capabilities to end-users. Simply install the Yellowfin application for the iPhone, iPad or Android device and connect to your Yellowfin report server to

access existing Yellowfin report content.

There's no need to re-create content for the mobile platform, or repackage it for mobile distribution.

## Ease of use

Yellowfin's Mobile BI solution is device independent. This means that any content created via Yellowfin on the Web is instantly accessible via a mobile device.

This means less training, less re-work and less administration – saving you time and money!

## Summary

- Yellowfin's Mobile BI platform is fast and easy to install and use
- Yellowfin's Mobile BI platform supports device independence
- Yellowfin's intuitive Mobile BI solution facilitates widespread end-user adoption and outstanding ROI

## High Return On Investment

Yellowfin's market-leading and consumer-oriented Mobile BI solution facilitates truly pervasive BI and therefore delivers outstanding Return On Investment (ROI).

The rate of end-user adoption is the best method for measuring the success of any BI solution.

It's simple. The more people within a business who have access to the benefits of quality BI, the better equipped any organization will be to respond to, and take advantage of, opportunities and shifts in their business environment.

Mobile BI enables widespread user adoption and drives exceptional ROI.
