

The Business:

My Lands: Black Gem Hunting is a Massively Multiplayer Online Real-time Strategy (MMORTS) - with several localized websites catering to nearly two million players all over the world. Winners of 'Best Game' award at the ConfOG expo in Ukraine, the real-time military-economic strategy routinely sees interactions between thousands of players in real-time. Develop your city, trade, make alliances and wage war.

The Challenge:

My Lands required an expandable solution that would initially offer a wide range of alternative payment methods to all its localized websites. A custom language package would be needed - seamlessly integrated into a single secure global solution.

The Solution:

To begin with, many alternative payment methods were integrated, including PayPal.

In the process of integration and in the interests of future expansion of the game - Gate2Shop provided a dynamic subscription solution, which allows My Lands to manage and bill its gamers. The package is embedded into the one-time payment platform that the Russian game giant is using.

Finally, Gate2Shop provided a localized language package, leading to user-friendly payment process for players in the several regions where the game is active.
