

# Dare to Compare

At some point in your data management initiative, the time comes to compare apples to apples--to weigh the pros and cons of competing solutions.

There's No Comparison. We Think Adept Wins Hands Down. Here's Why...

## **Tighter Document Security** – Adept's Smart

Document Vaulting provides the security and control you need. And unlike others, it does all this without the hassle of encrypting or scrambling your file names or folder structure. Your proprietary, mission critical corporate documents are never held hostage.

## **Fast, Rapid Access & Collaboration** – Adept

provides single or multi-site organizations secure, controlled access to documents from any connected location. Adept delivers built-in security, version control, and an audit trail for each document throughout its lifecycle. Adept Vault Replication lets multiple geographic locations share a common Vault while, providing users at any location with fast, local access to files. The result? You always work on the latest version—anytime, anywhere. When you activate Adept's Binary Differencing option only the changes between files—not the entire file—are replicated, making your transfers faster and minimizing network bandwidth.

## **Best Multi-CAD Integration** – Unlike other solutions,

Adept delivers tight integration with the world's most popular CAD products, including AutoCAD® and AutoCAD-based products, Autodesk Inventor®, SolidWorks® and MicroStation®. Adept delivers the same powerful features and intuitive interface for all of its CAD applications, so user adoption is fast in multi-CAD environments—whether in house or across geographically dispersed sites.

## **Proven Track Record** – Used by over 30,000

design and engineering professionals, from small and medium sized manufacturers to some of the largest corporations, Adept manages and controls the intellectual property and assets of the world's most competitive companies. Our strategic partnerships with Autodesk, Inc. and Dassault Systèmes SolidWorks Corporation guarantee you the “highest level of integration” with their CAD applications. Our integral partnership with Oracle delivers you the world's foremost viewer inside Adept at no extra charge for unprecedented viewing, redlining, and printing.

## **The World's Most Powerful Visualization Solution** –

Adept Desktop, Explorer and Reviewer includes Oracle's AutoVue 3D Professional, the world's premier visualization tool for design, engineering and business applications, at no extra charge. The Adept viewer provides native support for up to 450 formats, giving stakeholders across the enterprise critical access to data and easy tools for feedback during all stages of the design process and project lifecycle.

## **Extreme, Flexible Transmittal Tools** – Compare

Adept's transmittal tools side by side with other solutions and you'll agree: Adept's transmittals are fast, easy to use, and extremely flexible for creating, sending, and tracking. Since the transmittals you send are all created from inside Adept's controlled environment, you reduce the risk of errors compared to paper-based transmittal processes. You're also guaranteed that your transmittals always include the latest documents and their referenced files.

## **Data Management Is All We Do** – Whether you need

to get control of your data in a workgroup or across a global enterprise, Synergis Software is 100% focused on your organization's success. With over 20 years of solid experience in developing, implementing and supporting Adept data management software, our people have the talent and in-the-trenches experience to deliver the highest quality software, training, and implementation services personalized to your organization's needs. As a partner with Synergis Software, you have a direct line to everyone in the company—your Account Manager, Implementation Specialist, Project Manager, Helpdesk, the Executive team, and the entire Development group.

Unlike other software companies, we are 100% hands-on involved in making you outrageously successful.
