biNu

Your Smartphone in the Cloud

biNu is a 100% cloud-based platform that delivers a lightning-fast smartphone experience to mass-market feature mobile phones.
It is 10x faster and uses 10x less bandwidth than a standard mobile browser even on congested networks.
biNu works on almost any screen size on virtually any Java, Android or Blackberry mobile phone. Text can be displayed in more than 200 languages, regardless of the phone's installed languages.
