THE COMPLETE SECURITIES FINANCE SOLUTION

4sight Securities Finance (4SF) provides front to back office software that helps you to increase volumes and manage risk.

4SIGHT
FINANCIAL SOFTWARE

4sight Securities Finance

Improve efficiency and reduce risk

The 4sight Securities Finance (4SF) product suite provides a real-time front to back office software solution. The system helps you to trade more quickly, automate manual processes and improve efficiency. This frees up time so you can concentrate on increasing profits and improving service levels for your clients.

4sight Securities Finance (4SF) also contains features that allow you to gain greater control over risk. The software provides tools that can help you reduce the likelihood of losses in a crisis, and supports you in demonstrating to clients that you can manage their risk more effectively.

Modular design

4SF consists of the following core modules:

- Securities lending & borrowing
- Repo
- Swaps
- Xpose (Collateral Management)

Each module can act as a standalone solution or as part of an integrated system.

The 4SF product suite also offers a range of additional integrated sub-modules, these include:

- Cash Netting
- Recalls
- Web Reporting
- Workflow Management
- Interest Rate Risk

We continually develop new modules to enhance the system and help you stay ahead of your competitors.

Configurable to your needs

Clients in 15 countries and 5 continents use 4SF and our software meets the needs of financial institutions of all sizes. This includes direct lenders through to global custodians, broker/dealers, prime brokers or intermediaries. Whatever your business type, 4SF can meet your needs.

4SF supports both agency and principal trading. The software can also trade a range of instruments including equities, fixed income securities, synthetics, OTC products and exchange traded funds (ETFs).

Faster trading

Trade entry features allow you to create trades more quickly, with less manual effort and fewer errors. Views of projected P&L at trade entry allow you to see instantly how profitable each trade will be.

A user-friendly position monitor helps you to view long and short positions at any level of your company. Color coded warnings indicate hot stocks, corporate actions and pay to holds, making it easy to see what is happening in the future.

Lifecycle automation

4SF provides you with a solution to manage the trade lifecycle more easily. 4SF supports the full lifecycle from collateral management and corporate actions processing to settlement. Simple views of trade events, bulk processing and recalls management help you gain a reputation for operational efficiency among your clients and counterparts.

Global processing

4sight Securities Finance meets the demands of global organizations trading over multiple desks. The system is scalable and supports multi-company, multi-currency and multi-market processing.

Improve collateral management

The 4sight Xpose module helps you to manage collateral more efficiently and integrates fully with 4sight Securities Finance. Xpose provides control over collateral for securities lending, repo and OTC derivatives. It gives you the tools you need to quickly gain a clear picture of your exposure and increase your control over risk.

Manage your workload more easily

4sight provides a workflow tool to view day-to-day tasks and organize your workload. You can set automatic alerts of key events, while managers can use the module to manage the workflow of their staff.

Easy integration

4SF integrates easily with third party systems and electronic platforms. This increases straight through processing and reduces trading costs. Our open database model makes it easy to extract data in any required format.

You can feed market data into the system from any source and send trade and settlement information to downstream solutions. 4SF can integrate fully with risk management, settlement and accounting systems. 4sight also offers interfaces to trading platforms, data benchmarking services and tri-party collateral managers.

Enhance communication

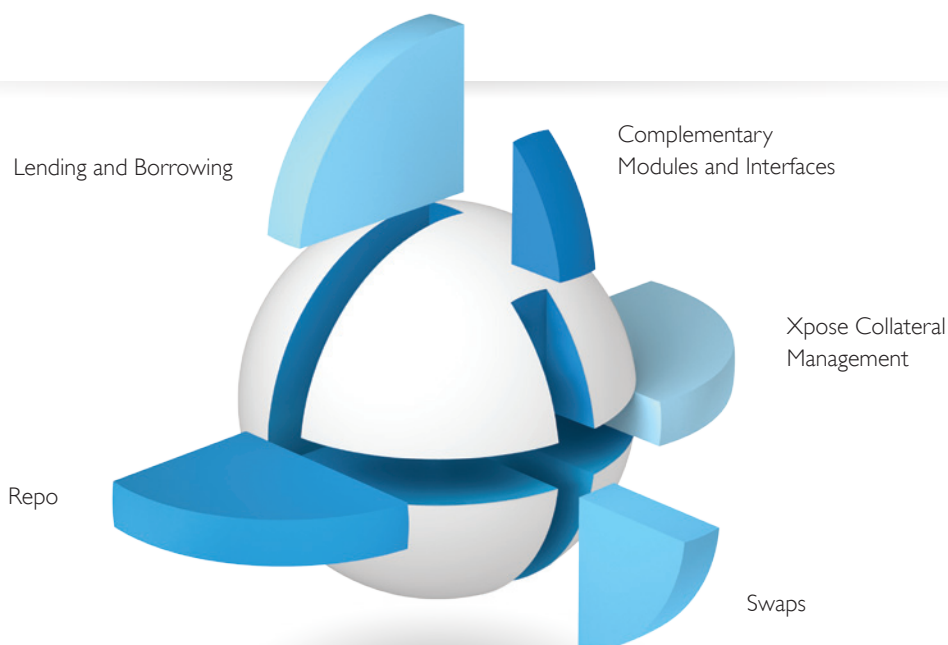

Our web based reporting allows you to run, schedule, email and automate all of your reports. You can create your own reports, customize existing ones and add your branding to them to meet your internal and external requirements. You can also improve transparency and customer service by giving your clients access to run their own reports.

Expert knowledge

As well as providing you with software, we can offer you expert knowledge on how to streamline your business processes. Our project managers have many years of experience and will provide you with new ideas that can help you gain an advantage over your competition.

Because your company's needs are unique, we provide a personalized approach to the project roll out and support following go live. We see each installation as an important long-term partnership to secure and support your investment in our technology.
