# AiNET Capabilities Overview

Capabilities Summary

- Data Center Colocation
- TIA-942 Tier IV Data Center
- Cloud-Based Applications
- Storage Solutions
- DR/COOP Solutions

- Information Assurance
- Internet Connectivity
- Fiber Network Construction
- Dark Fiber Networks
- SDB with GSA Schedule 70

Full NAICS Codes on Reverse

AiNET® is a recognized leader in high technology solutions requiring mission-critical IT infrastructure and best-in-class support. AiNET provides data center outsourcing, specialized technology platforms for complex application hosting, and wide area connectivity for commercial and government clients.

AiNET distinguishes itself through its problem-solving approach and uncompromising operations. AiNET's data centers feature one of the nation's few certified SAS 70 Type II, TIA-942 Tier IV data centers. Notably, AiNET's are the only data centers that have deployed newly-patented power protection technology for added reliability.

This operational approach, combined with its platform of data center facilities, SAN storage technology, dark fiber infrastructure, global IP backbone, and a world-class technology team, uniquely position AiNET to address needs for critical colocation infrastructure, turnkey data center consolidation solutions, and applications outsourcing.

AiNET Facility Planned 2012

AiNET WDC-13 Laurel, MD

AiNET WDC-8 *TIA-942 Tier IV* Beltsville, MD

AiNET Regional Fiber Network

300 W.Lexington Baltimore

1275 K St. Washington

AiNET Washington, DC Fiber Network

- 10 Gbps interconnections
- Carriers at the facility
- Internet AS 6405 network and distributed storage cloud

Overview of AiNET Facilities in the Washington, DC Region

Why AiNET? 6 Key Differentiators

- More Reliability
- More Services Available
- More Flexibility

- More Connectivity Options
- More Security
- More Value

Only AiNET offers such comprehensive differentiation!

More Reliability. Whether it's the TIA-942 Tier IV designation, newly-patented power protection technology only in our data centers, or the confidence expressed by our 100% SLA, AiNET data centers offer unique levels of reliability for your mission-critical applications.

AiNET · 11700 Montgomery Road · Beltsville, MD 20705 · 301-931-6574 · www.ai.net

More Services Available. As a partner of leaders such as IBM, Microsoft, VMware and Citrix, AiNET offers a complete range of Cloud services on demand and cost-effectively – hosting, IaaS, SaaS, PaaS and AiNET's leading Cloud-based storage solution based on our own cutting-edge SAN, the AiNET Peta10. 24x7 Remote Hands services are available, as are a full suite of Professional Services.

More Flexibility. What if you need a cage today but a suite in year? What if your power needs double in the same space? For AiNET, change itself is normal – your needs change, and we figure out how to accommodate them. We'll design and build whatever you need, even power densities at the level you need. With AiNET, you get just what you need, not just what we offer.

More Connectivity Choices. Use AiNET's own Internet member network (AS 6405) for your Internet access, choose your carrier of choice via in-building or inter-building cross connections via AiNET's regional DWDM fiber network, or even let AiNET's OSP fiber construction services build just for your needs. With AiNET, you choose the connectivity approach that's right for you.

More Security. Beyond building physical security, SCIF support, and a range of DR/COOP solutions, AiNET's unrivaled expertise in Information Assurance and Security protocols provide a more critical level of cyber security for your mission-critical data and applications.

More Value. AiNET delivers value across the board. Combining price level with predictable, bottom-line price figures, your AiNET invoice is the same in January or July. And now with FREE, cloud SAN-based storage, AiNET combines all of the above with incomparable value whose benefits flow straight to your bottom line.

Only AiNET is this comprehensive of a partner for your data center needs – one call does it all! Please visit www.ai.net/why-ainet for more information on AiNET's points of unique differentiation.

AiNET's Primary NAICS Codes

237130 Cable laying (e.g., cable television, fiber optic, data, electricity, marine, telephone), including underground
237130 Telephone line construction
238210 Cable splicing, electrical or fiber optic
238210 Electrical contractors
238210 Computer and network cable installation
334111 Computer servers manufacturing
334112 Storage devices, computer, manufacturing
423430 Data processing machines, computer, merchant wholesalers
423430 Disk drives, computer, merchant wholesalers
517110 Local telephone carriers, wired
517110 Long-distance telephone carriers, wired

517210 Telecommunications carriers, cellular telephone
517410 Long-distance telephone satellite communication carriers
517911 Telecommunications resellers
517919 All other telecommunications
518210 Application hosting
518210 Web hosting
541330 Engineering consulting services
541512 Computer hardware consulting services or consultants
541512 Computer software consulting services or consultants
541513 Computer facilities management services
541618 Telecommunications management consulting services

AiNET Government and Public Sector Cage Code: **5THV6**
