Network Services

IRG is a premier provider of broadband-enabled network services, serving retailers and multi-site companies across the globe. IRG partners with its clients to serve as a single, comprehensive source for industry-specific managed broadband-related services and solutions, while offering 24/7/365 proactive, dedicated support from one of our multiple Network Operation Centers.

VPN

IRG has a growing client base including Fortune 1000 retailers with locations worldwide. IRG also provides valuable overlay applications including Hotspot and Enterprise Wi-Fi solutions, Hosted VoIP, and IP-based Video Surveillance to name a few. These bottom-line impacting services allow clients to further leverage their WAN investment while being assured IRG handles multiple aspects of their clients' security component WAN infrastructure as a VISA PCI DSS Validated Service Provider.

24x7 Total
Device & PCI
Management

"The IRG team fully stepped up to the challenge of being the hands-on WAN partner we envisioned when selecting them. Their detailed management of the 400-plus site store rollout was top notch, and their willingness to hunt and find low-cost broadband service, even when initially there appeared to be no broadband available, is unparalleled to anyone we've evaluated in the past. We value the partnership with their organization."

IP-based Video
Surveillance

– Scott Toth, Divisional Vice President of IT for JoS. A. Bank Clothiers, Inc.
