

URETEK

ABOUT US

Uretek specializes in improving the weight-bearing capacity of subsurface soils through the injection of patented, lightweight polymers. For 20 years, Uretek has safely provided leveling, lifting, sealing and structural stabilization for structures of all sizes.

OUR PROCESS

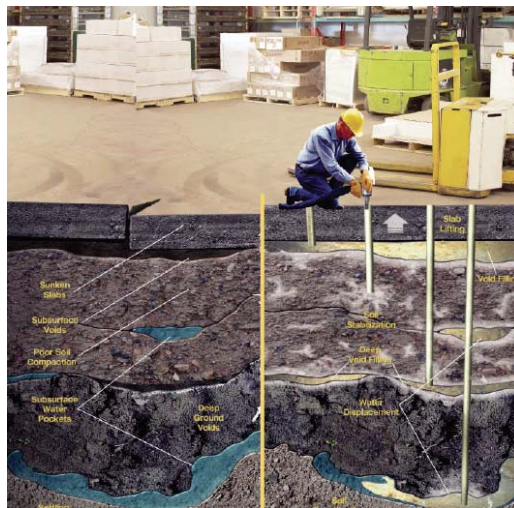

Having problems with your building or facility's foundation? Uretek provides cost-effective, expedient, eco-friendly and minimally disruptive solutions for your foundation issues. We inject a geotechnical, quick-curing polymer directly into the soils below your structure to solidify weak soil zones, voids or to lift or seal leaking structures. Our solution creates a structurally sound, permanent solution to subsurface problems versus intrusive conventional reconstruction/replacement methods. Our in-house experts will determine your optimal solution to save you both time and money.

OUR CUSTOMERS

- Residential
- Commercial
- Manufacturing
- Industrial
- Local, State and Federal Government
- Maritime Facilities
- Geotechnical Engineers

SERVICES

- Sinkhole/Void Mitigation
- Storm and Waste Water Infrastructure Restoration
- Infrastructure Stabilization & Soil Erosion Control
- Manhole, Joint and Lateral Line Encapsulation & Sealing
- Restoration & Improvement of Soil Load-Bearing Capacity
- Emergency Infrastructure Restoration (Dams, Spillways & Levees)

Our Mission

At URETEK we strive to provide our customers with the most cost-effective, safe and minimally invasive foundation and soil stabilization solutions to protect their assets and livelihoods to the best of our ability.
