## Instant Access to Files Anywhere with MyNAS

**PARIS, FRANCE** – LaCie announced today the launch of its MyNAS iPhone®/iPad® app and remote access capability, which gives users instant access to files on their home network from anywhere. Compatible with the LaCie Network Space 2 and Network Space MAX network-attached storage (NAS) devices, MyNAS is simple and easy to use. A 30-second setup is all it takes to access music, photos and video while away from home.

### NEW LACIE MYNAS IOS APP

The free LaCie MyNAS app for iPhone and iPad gives convenient, instant access to files stored on a home network. Users are no longer limited to what is stored on their device; they now have access to terabytes of files and storage at home, too. Already filled up an iPhone with vacation photos and still have three days left on the trip? With the MyNAS app, simply move the files from the device onto the NAS to free up space.

### ACCESS FROM ANY BROWSER

From within a browser, MyNAS allows the user to download, manage, upload, and even stream certain types of files from their home network. This feature offers instant access from any computer, smartphone, or tablet. It's easy to share photos from the latest family occasion on a friend's home computer or at work. No need to create accounts with 3rd party websites, shuffle USB keys back and forth, or burn DVDs in order to share files.

### EASY SETUP

MyNAS revolutionizes NAS remote access, delivering the simplest setup in the industry. Just create a unique name for your network storage in the NAS dashboard, then access the device on the road with a simple, easy-to-remember web address: [mynas.lacie.com/name](http://mynas.lacie.com/name). Setup takes less than 30 seconds, and the user does not even have to leave the Dashboard.

### AVAILABILITY

MyNAS is available for Network Space 2 and Network Space MAX products as part of the OS 2.1 firmware upgrade. For additional information and to update, visit [www.lacie.com/mynas](http://www.lacie.com/mynas). To download the MyNAS app, visit [www.apple.com](http://www.apple.com). These features will be available in the coming weeks for d2, 2big, and 5big NAS products as well.

- Instant, anywhere access to all your files
- Share files with friends and family
- Terabytes for your phone and tablet
- iPhone/iPad app: MyNAS in your pocket
