

Introducing the New AutismPro®

AutismPro is the most comprehensive, effective suite of professional development and management resources available for educators, healthcare professionals and managed care organizations working with students with Autism Spectrum Disorders and other developmental delays.

COST-EFFECTIVE. BUILDS COMPETENCY AND CAPACITY.

Provides school districts with a cost-effective, scalable resource to build staff competency and capacity. Helps users to better meet the *behavioral and academic needs* of the growing student population with Autism Spectrum Disorders and other developmental delays.

STUDENT-CENTERED. ASSESS, PLAN, TRACK.

AutismPro Insights™ helps educators create a positive learning environment for students with autism and other developmental delays. *Insights* is a powerful system that combines easy-to-use assessment tools, educational and behavioral resources, data tracking, and customizable reporting features. Helps educators quickly develop individualized, *specific and measurable strategies* to maximize learning for the special needs student, as well as the entire class.

RESEARCHED-BASED TREATMENTS. AUTHORED BY EDUCATORS FOR EDUCATORS.

Expert-authored curriculum created by experienced educators with expertise in managing challenging behaviors, as well as by Board Certified Behavior Analysts, behavioral scientists, and parents of students with ASD. Access the leading, *most current and researched treatments*, including ABA, drawn from some of the world's leading experts.

LEADING, RESEARCHED-BASED TREATMENTS.

AutismPro provides end-to-end implementation support, *best-practice training, and flexible, affordable* support options.

AutismPro® Workshops

AutismPro Workshops is an easy-to-use suite of multimedia training tools for educators, paraprofessionals, and healthcare professionals who work with students with Autism Spectrum Disorders (ASD).

Workshops opens up a world of solutions and options to educators and professionals to help them make a lasting impact on their students. Workshops will help staff to more confidently and successfully develop and manage comprehensive individualized education treatment programs for students with ASD and other developmental delays.

WORKSHOPS HIGHLIGHTS

Over 40 hours of eLearning content:

offers real-world situations for immediate use in the classroom to help build inclusion and staff competency. With new workshops available throughout the year.

Expert-authored curriculum and tools:

created by experienced educators with expertise in managing challenging behaviors, as well as by Board Certified Behavior Analysts, behavioral scientists, and parents of students with ASD.

Curriculum to address skills development:

provides teaching staff with effective activities to address the unique needs of students in **Eight Skill Areas—Cognitive/Academics, Expressive Language, Receptive Language, Communication, Emotional, Social, Motor, and Independence.**

Highly engaging, immersive learning activities:

interactive, multimedia content includes video demonstrations featuring both 1:1 and group settings with both younger and older students. Narrator-guided exercises. Scored quizzes to ensure learner competency.

Created for the needs of the adult learner:

immersive, interactive lessons provide the depth and frequency needed to help increase learning. Our dynamic format improves learner retention and performance so users can maximize their potential with students.

Flexible and convenient: Web-based platform allows users to access resources from school, home or anywhere they have Internet access.

Build capacity through district and school:

expand your teaching and support staff through our extensive knowledge base. Quickly build effective learning plans for specific teachers, paraprofessionals, and support staff. Use our Learning Management System to search and find staff objectives, or create your own.

Demonstrate competency: daily, weekly and monthly staff progress tracking and reporting to support professional development for staff across school districts, individual schools or classes. Print certificates of completion, create reports to demonstrate mastery of curriculum.

AutismPro® **Insights**

AutismPro Insights™ helps educators build individualized student plans and create a positive learning environment for students with autism and other developmental delays. Formerly “AutismPro Resources,” the new *Insights* platform is a powerful system that combines easy-to-use assessment tools, educational and behavioral resources, data tracking, and customizable reporting features.

TWO POWERFUL RESOURCES IN ONE.

Skills Acquisition Planning Tools—helps teachers and staff managing educational goals and objectives, and provides activities. Assess individual student’s skills, then find and select specific student goals, objectives, and activities. Or create your own.

Insight’s Skills Acquisition Tool Will:

Provide fast access to **over 300 objectives across 28 curriculum areas.**

Complement your student’s IEP using our searchable database of **over 5,000 expert-authored resources and activities.**

Allow you to create custom data sheets. Or use our pre-built data sheets to make reporting easy.

Help you track your student’s progress for each objective or for individual activities.

AutismPro Insights™ helps educators quickly develop effective individualized, specific and measurable strategies to maximize learning for the special needs student, as well as the entire class.

The new *Insights* platform gives users a comprehensive solution for building, managing, and monitoring individualized plans for students with autism and other special needs.

New Feature:

Positive Behavior Support Planning Tool—define problem behaviors, then search, edit, and create support strategies. Gain insight into how to better manage challenging behaviors for your students.

All team members can view, capture data and track progress for each behavior support strategy.

Create data sheets to measure identified behaviors, capture data directly into the AutismPro system to track outcomes.

Generate reports with graphs and your comments about your student’s challenging behaviors and progress over time.

We now offer a new series of workshops on Understanding and Managing Challenging Behavior. **Available through AutismPro Workshops.**
