

WELCOME TO

TRUMPET BEHAVIORAL HEALTH GUIDE TO SERVICES

Our Mission. Our Promise. Our Commitment.

Trumpet Behavioral Health maximizes the potential of children, adolescents, and adults with autism spectrum disorders and other developmental delays by providing leading evidenced-based treatment services by ABA experts and by engaging in clinical research to find the most effective and efficient treatments. We also empower our clients' families, educators, and healthcare professionals through training and education services.

Why Choose Trumpet?

Proven Methods

Trumpet Behavioral Health’s clinical services are based on the principles of Applied Behavior Analysis (ABA). This is a systematic, evidence-based approach that helps address communication, behavioral, and other vital skills deficits. ABA therapy is widely recognized as the most effective treatment for children with Autism Spectrum Disorders (ASD). Our results bring a lifelong positive change to our clients.

Team Approach

No one can handle developmental disabilities alone. It takes a circle of care. Our Board Certified Behavior Analysts (BCBAs®), paraprofessionals, SLPs, and OTs, collaborate with educators, healthcare providers, families, and most importantly, each person with ASD we serve. We individualize assessments and tailor treatment to each client to ensure they receive the best clinical care available for their special needs. What’s more, we provide 40 hours of intensive training for our staff that goes beyond what is required by state mandates. This ensures our staff provides clients and their families with unparalleled care.

Professional Development

We also feature our award-winning ASD training tools. AutismPro® is a suite of web-based training, teaching resources, and outcomes-tracking tools for use by families, educators, healthcare professionals, and managed care organizations who make up the client’s Support Team. Our software helps make the entire Support Team more confident and effective in supporting the development of these individuals. AutismPro is the only autism software product endorsed by CASE (Council of Administrators of Special Education).

Who we are

Trumpet Behavioral Health (TBH) specializes in the treatment of children and adults with autism spectrum disorders (ASD) and other developmental delays.

We provide behavioral consulting, education, and training for parents, educators, and healthcare professionals. Through our network of nearly 1,000 passionate and highly skilled staff and Board Certified consultants, our structure enables the best possible behavior management outcomes based on Applied Behavior Analysis (ABA).

We provide our effective clinical services in homes, schools, communities, and intensive treatment centers. Our team of consultants are Board Certified Behavior Analyst® (BCBA®) and Board Certified Assistant Behavior Analyst® (BCaBA®) providers.

Trumpet Behavioral Health is a privately held company with offices, services, and intensive treatment centers in Arizona, California, Colorado, Hawaii, Kansas, Missouri, Ohio, and Wisconsin.

Our Philosophy

We respect the uniqueness of each individual, including their thoughts, feelings, and actions. We also value the importance of our clients' family, school, and community relationships.

We acknowledge the values and strengths of these individuals, their families, and others who teach and support them.

We recognize the need and are committed to working collaboratively within each individual's environment and supportive relationships to effectively nurture human growth, improve behavioral functioning, and enhance the life quality of each individual.

“We empower our clients to maximize their potential.”

Why the Elephant?

We are Trumpet Behavioral Health

Inspired by the example of the elephant—a noble creature whose great size and power are wonderfully blended with compassion, longevity and commitment to the young of the herd.

The elephant uses its trunk to touch, to play and to **trumpet** as a means of communicating its affection for family and friends. The mighty elephant is also a symbol of strength. Protecting the herd and delivering the young to safety and sustenance.

The elephant is the perfect symbol for our organization’s leadership in behavioral health services. Our team is committed to providing families, educators, healthcare professionals, and insurers the most professional, evidence-based autism services available.

Every day, we tenderly care for each client we serve and are committed to maximizing their potential.
