**Fundraising Success with DonorCommunity Inspires Children’s Fund for GSD Research to Renew Its Annual DonorCommunity Subscription**

**SUNRISE, FL December 19, 2011** – DonorCommunity, Inc., developers of an innovative cloud computing software platform for nonprofit organizations, announced today that the Children’s Fund for Glycogen Storage Disease Research has become the latest nonprofit firm to renew its annual subscription to the DonorCommunity platform of fundraising, website content management, online marketing, online donations, social networking and event management applications.

“DonorCommunity’s Web Content Manager has provided an easy and efficient way for us to recognize donors, create personalized fundraising pages, promote events and share the latest research and treatment information about Glycogen Storage Disease, Type 1 (GSD1), a very rare genetic disorder that afflicts less than 1,500 children worldwide,” said Children’s Fund for GSD Director and Fundraising Chair Lisa Hodes. “During our first year, we primarily focused on upgrading the look and feel of our Website and making the content more dynamic. For the first time, we were able to offer online registration and sell tickets for our annual golf tournament through the e-auction. The support from Donor Community has been exceptional. This year, we look forward to taking full advantage of everything they have to offer in order to enhance communication with our donors and maximize our fundraising results.”

“The Children’s Fund for GSD Research demonstrates the extraordinary impact a committed group of parents can have when they come together to fight a childhood disease like GSD1,” said David Blyer, DonorCommunity founder and CEO. “We share their hopes for better screening, treatments and an eventual cure. We’re proud to welcome The Children’s Fund for GSD Research to another year as members of our client community.”
