

Active Risk Management

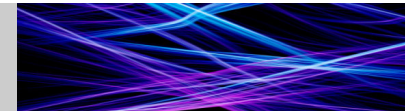

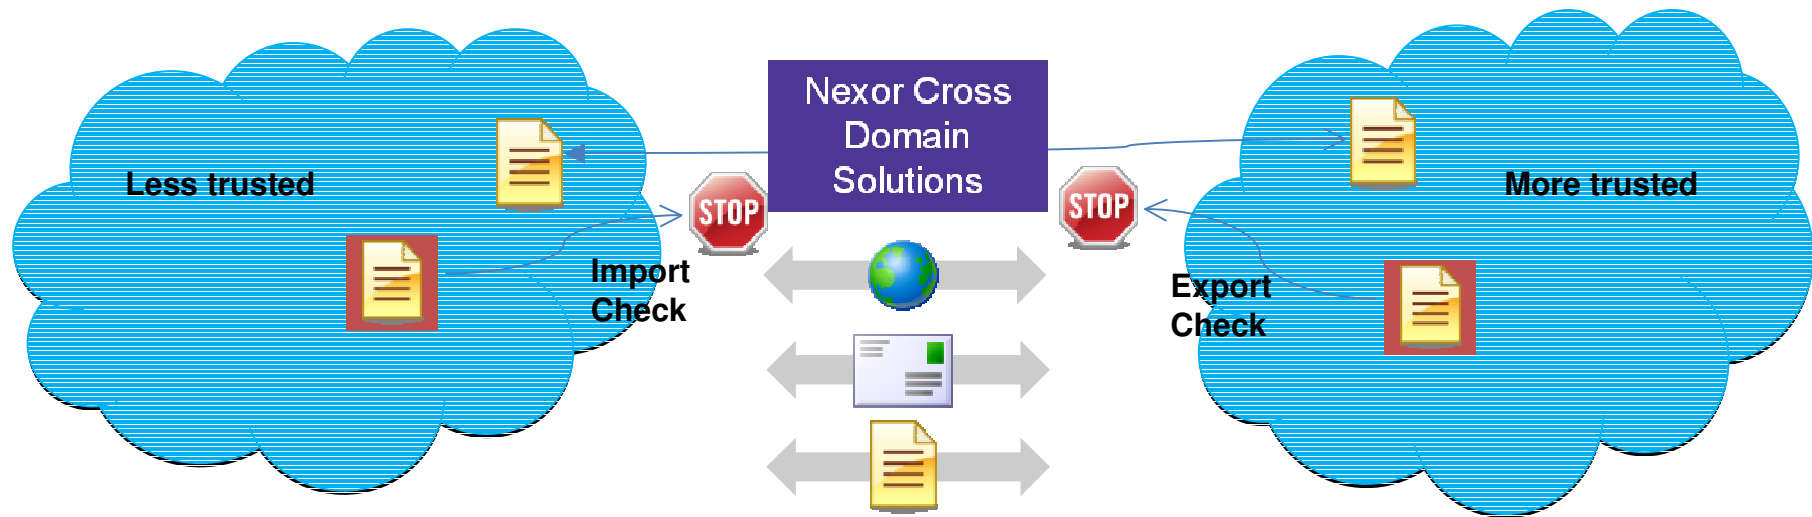

Colin Robbins

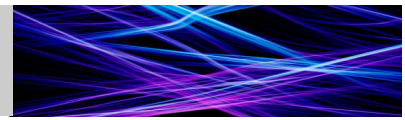

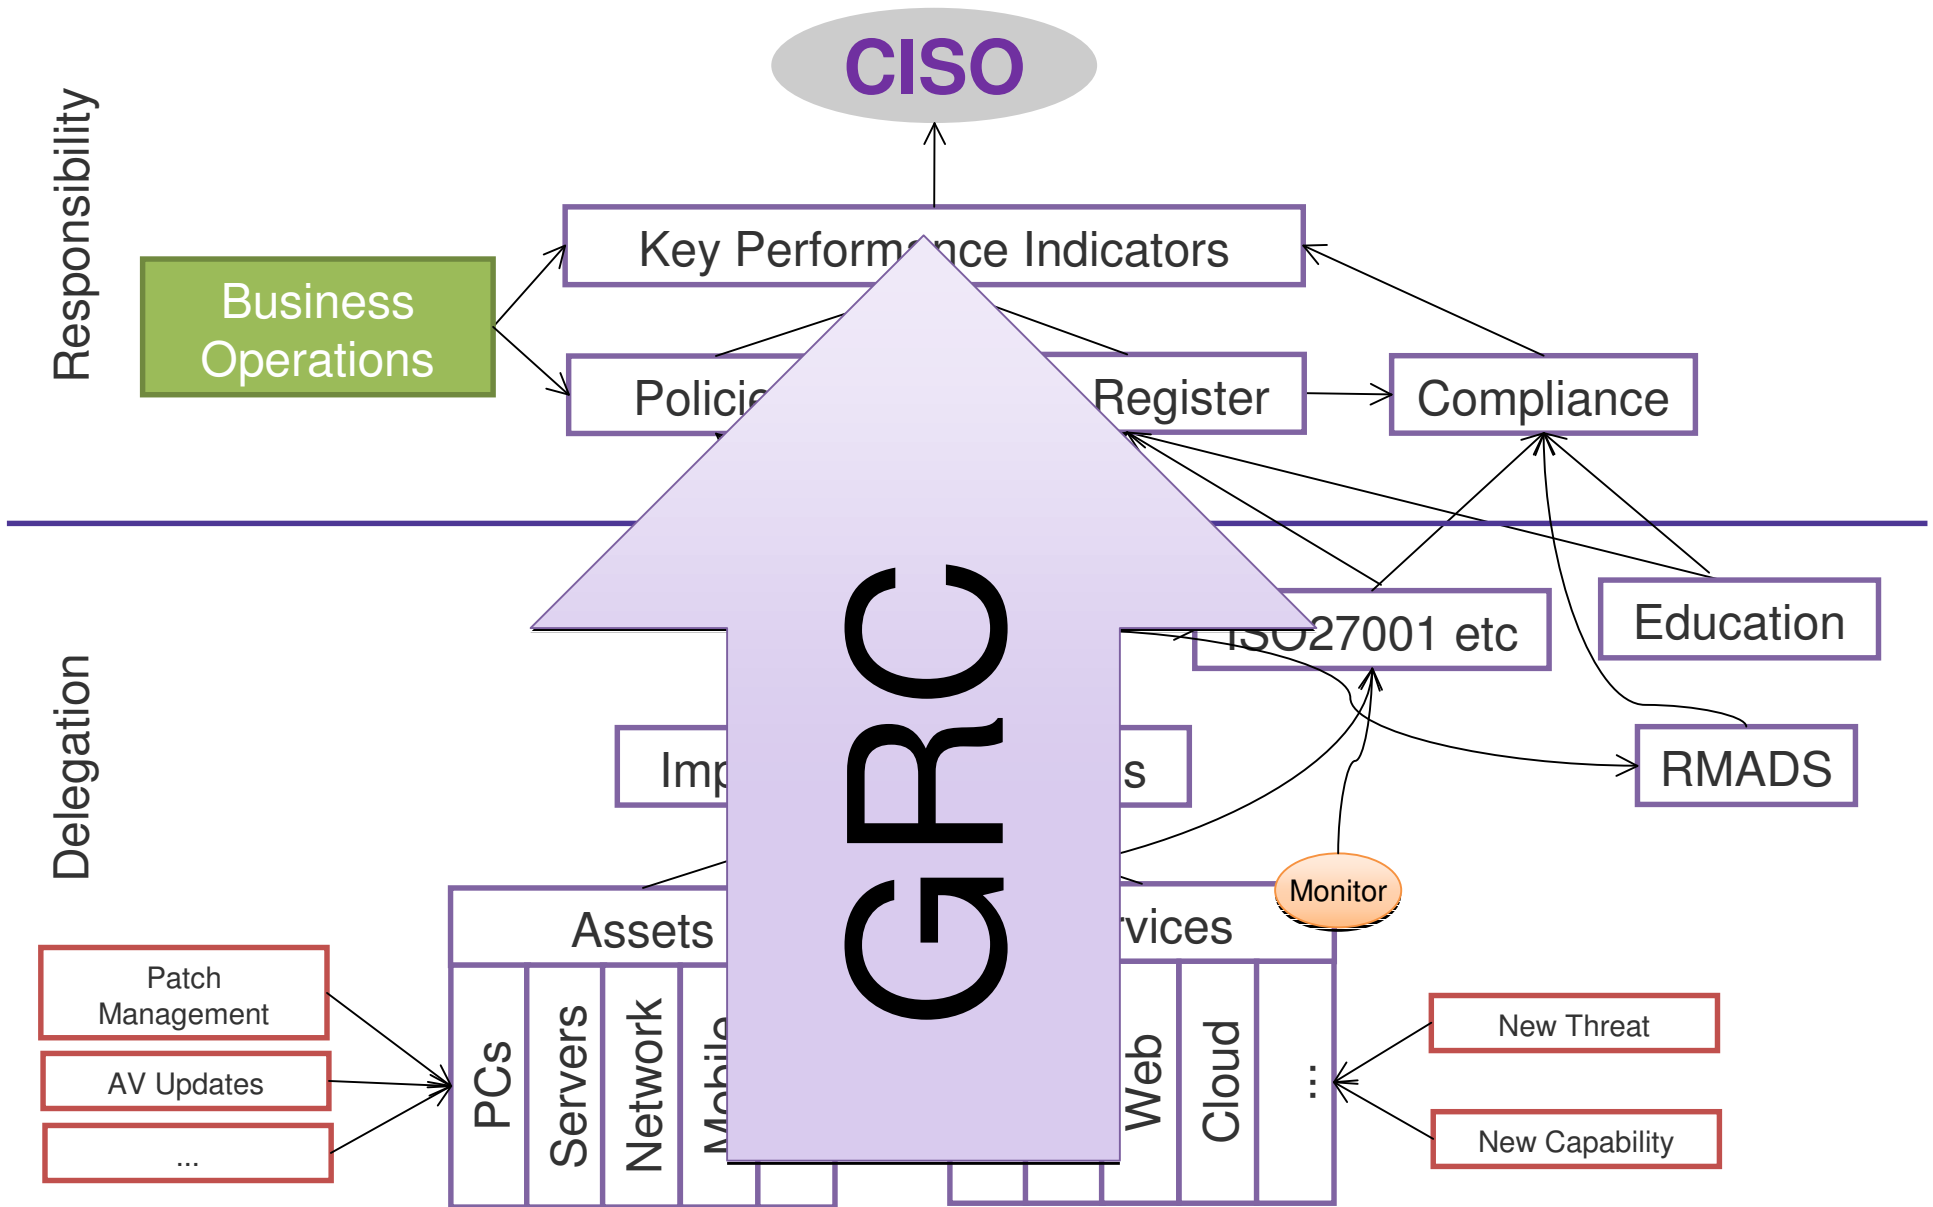

NEXOR[®]

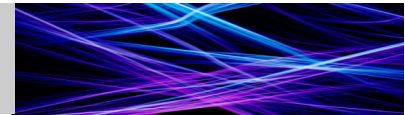

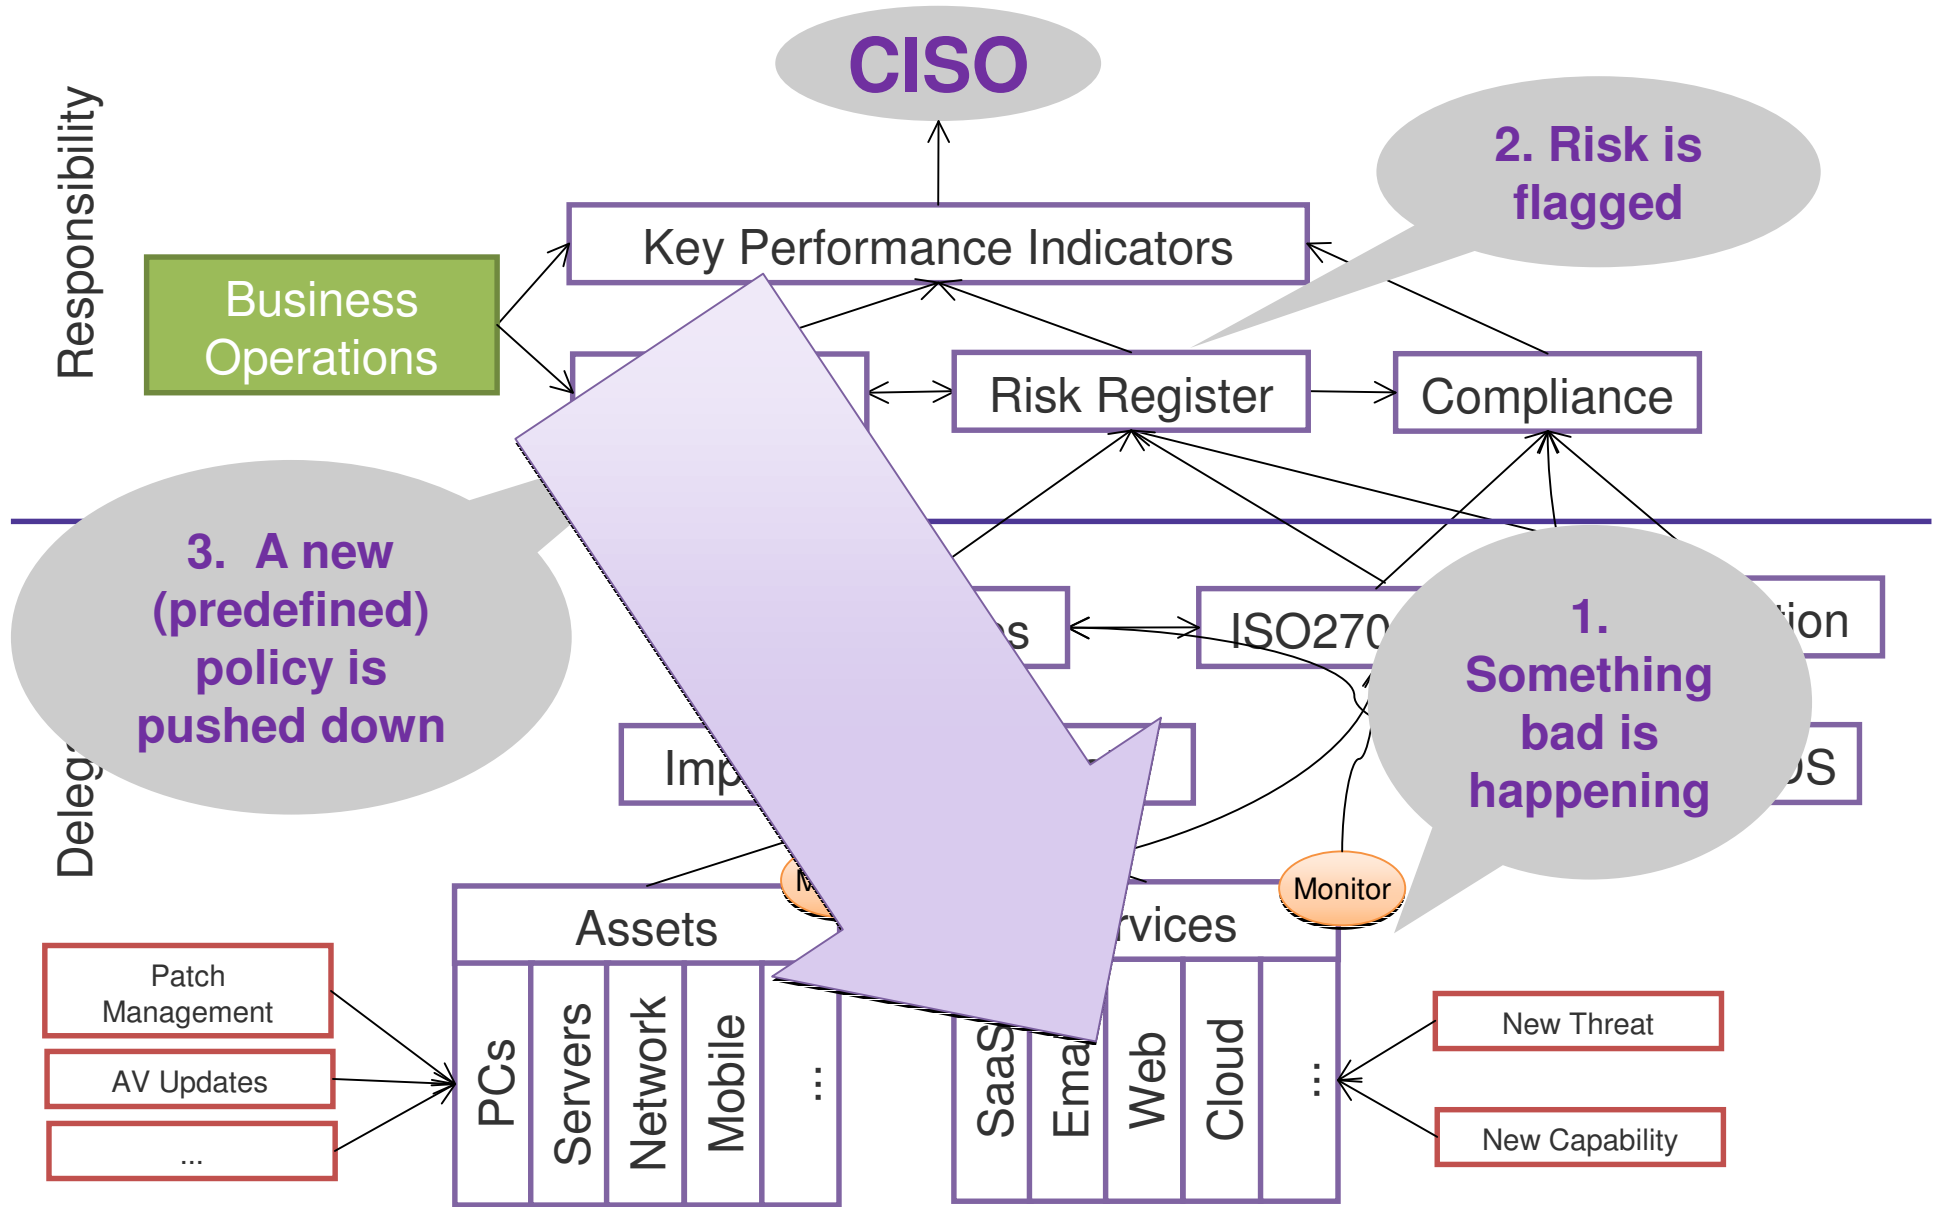

Prepared for iGRC TD2 Presentation

Nexor mitigate cyber threats, enabling the exchange of information

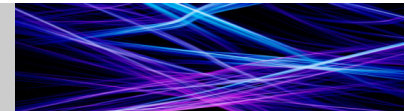

Summary

- Nexor provide technical controls to manage threats
- Want to reconfigure the controls quickly to respond to changing business situations.

- iGRC (today)
 - gives us a framework to make business decisions

- iGRC (tomorrow)
 - gives us a framework to act upon the decisions
