

Advanced [Home Security Systems](#) from Your Alarm Now Provides the Option to Beef up Domestic Security during Power Cuts

The customers of the [home security systems](#) designed and installed by Your Alarm Now are now safe even during power cuts. The security packages offered by the company are equipped to continue working without home power, thanks to its backup power technology. Your Alarm Now provides cutting edge security solutions for homes in the neighboring Canada, in addition to the United States.

[Home security systems](#) customers of Your Alarm Now in America and Canada need not worry about their safety even during power breakdowns. The packages provided by the company are now powered by power backup technology that helps them keep working during the non availability of home power. The conventional security packages rely completely on home power, and hence become totally non functional during power cuts. Battery power back up is the latest innovation in the security industry, and it is designed to provide non stop security to the customers irrespective of availability of power from external sources. All the packages from Your Alarm Now are equipped with additional power backup batteries to provide peace of mind to customers.

The burglars and thieves are well aware of this limitation of the conventional [home security systems](#), and many households become their target during the power cuts. Fortunately, the technology of security systems has improved significantly over the last few years. Your Alarm Now has always made an effort to provide all the latest devices and technologies to their customers within an affordable budget. In addition to the additional battery back up system, their systems can also work without a basic landline phone. This is also a vital enhancement because it provides an undisturbed security solution that remains functional even if the telephone line is cut. The owner of the company Mr. Paul Shakuri was recently quoted saying, "The technology of home security has seen dramatic improvements recently. We promise to bring all the latest innovations to you for a reasonable price".

The security packages from the company are priced between \$35.99 and \$45.99 per month. All these packages have the backup power facility to work during power cuts. Some other popular components of the [home security systems](#) from them are loud burglar alarm, motion detector, window and door sensor, etc. The user friendly features of the packages have already gained immense popularity amongst the customers. The company sources have revealed that the company is about to make further enhancements to their systems very soon.

About the Company: Your Alarm Now is a fast growing security solutions provider that operates out of Arizona. Their service is now available throughout Canada and America.
