THE WORLD'S SAFEST EARPIECE.

Introducing earHerosport.

Designed by an audiologist, earHero's speakers are so tiny they never block your ear canal. You can hear whisper-level sounds from yards away while identifying their precise location—and you could literally talk on a separate phone without removing earHero from either ear, because both ears are sending signals to your brain. The wires are so thin and clear they are virtually undetectable, and the design is so comfortable you'll barely know it's there.

earHerosport. Hear it all.

More comfort.

Ergonomically designed to eliminate ear fatigue, earHero moves with you through hours of activity.

More safe.

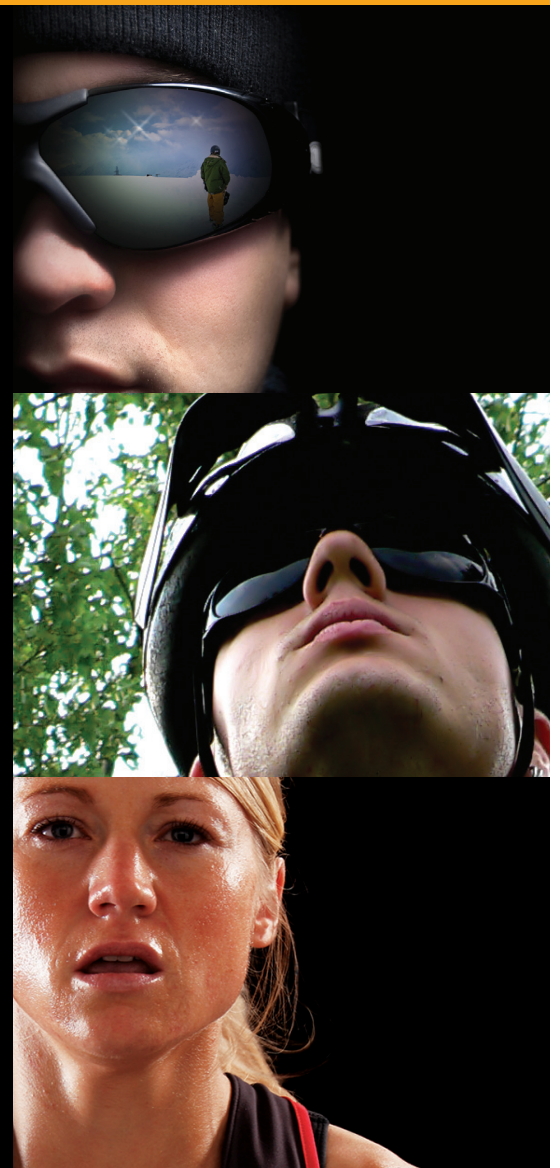

earHero's miniscule speaker size leaves your ear canal open to all other sounds.

More sound.

Now you can listen to your surroundings—and your input device—with both ears. Because two ears hear better than one.
