DASTON
CLOUD FIRST

EXPERIENCE. INNOVATION. RESULTS.

Cloud Computing Solutions
Making the Transition to the Cloud Painless and Profitable

Daston Corporation has developed a business practice dedicated to helping organizations realize the flexibility and cost-savings associated with transitioning from an on-premise to on-demand IT infrastructure model leveraging solutions including Google Apps, Postini, NetSuite ERP, OpenAir and kloudtrack®.

Cloud Computing Expertise

Daston's certified IT professionals have been serving the needs of federal and local governments for more than 18 years. Most recently, we have developed a business practice dedicated to Software as a Service (SaaS) and cloud computing to help state, local, and federal clients transform their information technology business model from on-premise to on-demand.

Daston's experienced professional services team makes it easy for organizations to move from their on-premise solutions into the cloud by providing a clear migration plan and strategy, as well as the expertise and personnel to do the move quickly and painlessly. We can also chart a course for moving your business and mission-critical applications to a cloud-based solution.

Our cloud computing expertise can help you decide on the right strategy for your organization including Software as a Service (SaaS), Platform as a Service (PaaS), and Infrastructure as a Service (IaaS) models. We help you assess and advise on which cloud technologies are best suited to your needs based on security, capacity, cost, and infrastructure needs.

With cloud computing and a SaaS model, not only is the overall cost of IT reduced, but you can move your IT investment from a capital expenditure to a recurring operations budget line.

Powerful, Proven Cloud Partners

Leveraging offerings from our best-of-breed technology partners, we work with our clients to craft a clear migration strategy, implement and integrate the solution, and boost user adoption. Our goal is to help clients minimize capital expenditure, achieve greater performance, gain greater independence, simplify business processes and improve communications within their organizations.

NetSuite Solutions

N1 NETSUITE SOLUTION PROVIDER

Daston is a certified solution provider for NetSuite, the #1 web-based SaaS business software suite available today. Leveraging NetSuite's integrated ERP/CRM solution, Daston has helped many organizations move away from their legacy on-premise solution.

- Daston provides a complete range of **Consulting and Implementation Services** to optimize your NetSuite environment.
- Leveraging our NetSuite expertise and our experience as a federal contractor, Daston has created **DCAA On-Demand.** This solution extends NetSuite's functionality so federal government contractors can seamlessly manage their business processes. The product resides within NetSuite and requires no installation or any hardware or software by the end users.
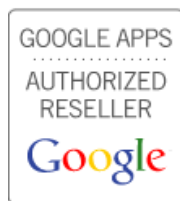

NetSuite-Related Solutions (cont.)

- Daston is a partner of **OpenAir**,
a NetSuite company and world leader in cloud-based professional services automation (PSA) and services resource planning software (SRP). Daston's consultants work with your organization to understand your business requirements and workflow, so we can set up your PSA/SRP system to best meet your organization's project planning and services delivery needs.

Google for Government

Daston is one of the first Google Apps enterprise partners in the Mid-Atlantic and a premier reseller and integrator for Google Apps, a secure and reliable communication and collaboration suite.
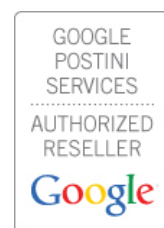

We have helped many state and local governments move away from on-premise Email and collaboration solutions such as Microsoft Exchange and Lotus Notes to Google Apps cloud-based enterprise solution. By moving to a cloud-based Email and collaboration solution, these organizations are realizing immediate increases in productivity and cost savings.

As one of Google App's most experienced implementation partners, we specialize in:
- Google Apps Pilot
- Google Apps Setup
- Google Apps Migration
- Google Apps Training
- Gmail eLearning
- Integration Services
- Google Enterprise Support

Daston also enables organizations interested in improving email security, discovery, and encryption through the implementation of Postini services. Postini is a Google company known for its success in ensuring email security by protecting organizations from unwanted messages and viruses.

kloudtrack®

Daston serves as the public sector implementation partner for kloudtrack®. A SaaS|Cloud solutions company, kloudtrack® offers Governance, Risk Management and Compliance (GRC) technologies for Business Process Management and Human Interaction workflow. kloudtrack® integrates best-practices management with audit trails that place a premium on monitoring users, data, transparency and collaborative processes.

Custom Cloud Solutions

Daston provides migration to, and application development for commercial and private environments including Amazon, Google and Terremark. Our cloud architects and developers will help make the best decisions on SaaS, IaaS or PaaS solutions. Our support includes application development for Google Apps engine, or moving or optimizing applications for the Amazon EC2 cloud. We also build custom solutions in government private cloud environments and we can help move your enterprise to the Google Government cloud.

For More Information

Daston's expertise is based on years of developing and deploying highly successful cloud solutions in both the commercial and government domains. With this expertise, we can move your organization and your applications to the right cloud, with the right technology, for the right cost.
