EyePlay: A Revolutionary Way to Captivate Young Audiences

EyePlay's premium package of interactive games allows you to engage children in a fun, exciting and innovative way. EyePlay is a highly advanced video game platform for the professional market with motion-activated games that kids can play with their entire body. Multiple players can run, jump, twist and dance, using their hands and feet to set in motion sounds and colorful graphics projected on the floor or wall. The games are extremely intuitive and easy to play, so everyone can enjoy them. EyePlay is perfect for amusement parks, theme parks, water parks, zoos and other entertainment centers that cater to a young audience.

Like a Playground, only Better

EyePlay is like having a full blown playground inside your facility - except it's safer and easier to maintain. It's the ultimate recreational solution for locations with inclement weather. EyePlay packages include 15 or 30 educational and action-oriented games that children can explore and play on their own or with others. The package includes many game options, such as Pop the Balloon, Simon Says, How to Play the Piano, Whack-A-Mole, Drums, Puzzle, Air Hockey, Soccer and many more.

The packages also include five or ten different game templates that can be easily customized to match your needs. Our simple and friendly editing tool lets you change logos, background images, sounds, videos and more to fit your environment and theme. If you prefer, our experienced team can make the modifications for you. With EyePlay's games alternating in your virtual play area, your audience will never get bored!

In addition to providing customizable templates, EyePlay offers a flexible advertising solution for park operators. The interactive floor can be leveraged to promote your brand or advertise sponsors with unique interactive effects, while games are not being played.

This gives you a versatile and practical way to optimize the use of EyePlay for the benefit of your facility.

15 games with 5 customizable templates or 30 games with 10 templates

The Latest Technology at Your Fingertips

EyeClick gives you a revolutionary way to present captivating content to young audiences. It delivers first-class games through cutting-edge software and hardware that can be professionally installed by EyeClick's experienced team. You are in complete control of the system, from changing the volume to switching games and selecting advertising content.

Thanks to our web-based EyeControl tool, you can monitor and manage EyePlay's system remotely from virtually anywhere in the world. EyeControl enables you to access all connected systems, manage content and scheduling, and receive instant email alerts about display malfunctioning or network problems. You can also control all content and applications running on the system and receive statistical information on the number of users and their level of interaction. The resulting data can help you analyze and enhance the use of your content to maximize your ROI.

EyeClick, Leading the Way in Interactive Technology

EyePlay features proprietary MotionAware technology by EyeClick, a leader in interactive products. EyeClick specializes in creating thrilling games and displays that transform designated areas like floors and walls into fun, interactive spaces. EyeClick designed educational displays for NASA's Kennedy Space Center Visitor Complex, Amazing Chicago's Funhouse Maze, the Beatles Story Visitor Attraction in Liverpool and All Children's Hospital. EyeClick's creative displays have been chosen by some of the world's leading brands, including Samsung, Volvo, Nokia, GE and Lancôme.

Here's what our customers are saying:

"EyeClick has been an exciting interactive way to educate. Thanks to this innovative technology, students engage in space science from yesterday and today kinesthetically. Students really feel they can own their learning."

Veronica Franco

Education/Information Specialist, NASA Educator Resource Center

"The EyeClick interactive floor performed beautifully and has become a great addition to the maze. Kids really like it. We see them dancing, running, stomping and even rolling around on the floor."

Jim Legner

Vice President and General Manager, Amazing Ventures

"The response has been overwhelming. I would highly recommend EyeClick to any company looking for rewarding and highly innovative content."

Jerry Goldman

Managing Director, The Beatles Story Visitor Attraction
