

1 Cree 3W Dimmable LED Puck Light

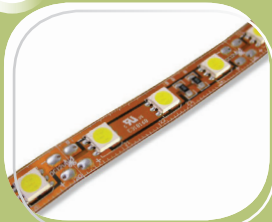

This compact, high-end light fixture is housed in a brushed aluminum enclosure for easy mounting or recessed installation. Perfect for lighting confined spaces, it includes top of the line, bright Cree LED chips.

5 Magnetic 12V On/Off Switch

These switches provide the perfect solution for lighting the insides of cabinets. Connects to the LED lights inside your cabinets, and only turns on the lights when the cabinet door is open.

2 High-Density Brighter LED Strip Light

Our brightest strip light! Comes with 3M adhesive backing for quick installation anywhere. Cuttable to custom lengths, flexible, dimmable and incredibly versatile. Great for task & accent lighting in any room.

6 Waterproof Color-Changing LED Strip Light

Perfect for adding dynamic lighting in outside environments, this silicon-coated, cuttable strip light includes tri-color RGB LED chips that can create a million color possibilities.

3 Aluminum Strip Light Channel with Diffuser

Protects and provides light diffusion for those bright LED strip lights. The channel can be mounted or hung from a ceiling, and is cuttable to custom lengths. The diffuser cover softens the light from the LED strip.

7 Waterproof Brighter LED Light Bars

This durable, silicon-coated LED light fixture is a great replacement for a florescent tube. The tri-chip LED bulbs deliver a lot of light, and its compact size makes for easy outdoor installation.

4 Reign 12V LED Dimmer Switch – Full Slide

This one of a kind, stylish wall mount LED dimmer connects directly to a 12V power source, creating fluid dimming with no flickering or humming. Also available in button slide and touch styles.

CONVERT YOUR DC POWER INTO 12V

All Elemental LED light products are wired for 12V DC power consumption. LEDs are rated to last 50,000+ hours and emit very little heat. Connecting LEDs to a power source that is a higher voltage will shorten the lifetime of the products and cause damage and overheating. If your vehicle's DC power output is higher than 12V, you'll need to install a Voltage Regulator. These can be purchased from Solar Converters and will also soon be available from Elemental LED.
