

eArcades.com Announces Update of [Free Online Games](#) Database

[Free online games](#) host eArcades.com has recently announced the addition of new items on its database. The site is prompted by enthusiastic gamer traffic to improve its listing and to continue to come up with strategies that will encourage more users to join the site.

eArcades.com plans to add more [free online games](#) after its first week saw the sign up of 2,000 eager gamers. Both guest and signed up players average 100 minutes on the site and it is this enthusiasm that Internet Marketing Services (IMS), owner of the website, wants to sustain.

eArcades.com continues to see a growing number of membership after its successful debut week. With already 5,000 [free online games](#) to offer, it seemed natural that players would patronize the site. However, IMS does not want to stop there and have just recently added several browser-playable games to eArcades' bulging database.

For those who are still unfamiliar with the site, IMS explains how it works. Gamers simply have to go to eArcades.com and browse through the [free online games](#) available. Then they just have to click on the game they want to play, wait a few seconds for it to load, then they are good to play. A 15-second reminder from sponsor will appear while the game loads. The website has a choice of [free online games](#) that range from simple to sophisticated, all of which can be played directly from a browser. All that players basically need is a mouse or keyboard to enjoy the 15 different gaming categories eArcades.com has to offer.

The games can easily be shared to friends and family through the different social media platforms that support eArcades.com. The site also encourages gamers to share their score with others so they can compare their skills with players from all over the world. This gives each user the opportunity to improve their gaming skills and meet new friends as well.

Having been around the Internet business since 2007, IMS acknowledges that it is not an easy task to venture into the gaming industry. It is a fiercely competitive territory but for IMS, the most important thing right now is that they are bringing fun to thousands of users through [free online games](#).
