# Products Overview

## Mobile Tables

- Only requires a regular 110v power supply
- Managed wirelessly through patented RF technology
- Tables fit two 15.5 gallon kegs & gas
- Glycol chilled for optimal beer temperature
- No major construction necessary
- Can be positioned *anywhere!*
- Great for outdoor patios!
- Use the i-Button Technology.

## Beerwall

- Works with our i-Button Technology
- Draft beer system built into a wall, island or permanent fixture
- Allows customers to pour beer from 2 to 16 different handles
- Everyone with functioning i-Button can try each of the beers offered

## Fixed Systems

Fixed Systems are ideal for new construction. Two or four beer lines can be run to each of the tables. Taps can be added to any table top you want!

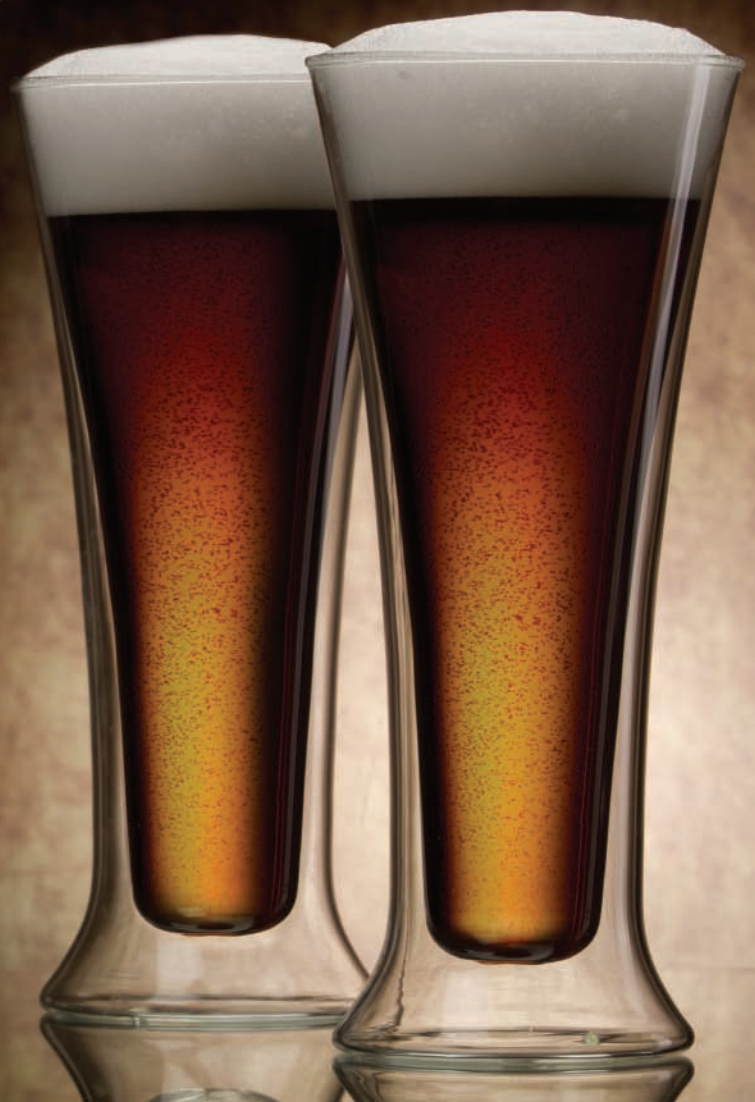

## i-Button Technology

i-Buttons can be pre-loaded with drink credits! A touch screen controller constantly communicates with the wall or draft table. It opens and closes the taps, and logs all activity. It can store up to a month's worth of consumption and sales data.

# Mobile Diagram

## HOW DOES IT WORK?

A touch screen controller, which sits near your POS, constantly communicates with the wall or draft table via Radio Frequency (RF). It opens and closes the taps, and logs all activity. It can store up to a month's worth of consumption and sales data.

RF controller sits behind the bar or at the wait station and wirelessly communicates with the tables.

Tower rotates 320 degrees so the beer comes to you.

51"

43.5"

Our i-Button Technology allows for an unlimited amount of legal-drinking-age customers in an establishment to use a Draft Table or Beer Tasting Wall to pour their own beer!

2 Kegs

## Mobile Pricing

### Features:

- No pythons or cables
- Mobile tables – position them anywhere
- Add new tables if required quickly
- i-Button Technology
- Move the tables out doors in fine weather
- No major construction work required
